£55,990 exc VAT

Condition: Used

Branch: Lloyd Ltd Dumfries

PRODUCT DETAILS

Type: Cultivation/Drills/Tillage

Make: BOMAG

Model: RS250

Meter Hours: 0

Stock Number: 31216963

CONTACT DETAILS

Branch: Dumfries

Phone: 01387 720461

KEY FEATURES

- BOMAG RS 250 Towed Soil Stabiliser
- Ex-demo
- The BOMAG RS250 tractor-towed stabiliser is the ideal machine for stabilisation projects such as farm tracks, pavements, road building, embankments and backfilling.
- A tractor-towed stabiliser can be used to mix in binders or stabilise and improve non-load-bearing soils.
- Stabilisation eliminates the need to replace non-load-bearing soils, removing moisture from the material by mixing binders (mix in place method). By mixing in cement, even unstable soils can be made load-bearing.
- The RS250 can be driven directly via the rear PTO shaft which means the system is light and highly manoeuvrable.
- Grants may be available for this machine - check with your advisor
- Weight: 4,450 kg
- Working width: 2,520 mm
- Perfect results in combination with tractors in the 200-300 hp class
- Input speed: 1000 min-1
- Easy coupling to the tractor with 3-point hitch (category 3 or 4)
- Milling depth up to 40 cm - variably adjustable with hydraulic lower links
- Equipped with BOMAG's unique BMS 15 L exchange holder system
- Cutting tool with 22 mm shaft diameter
