A Masterpiece in BRITISH ENGINEERING

For over 90 years the world's finest groundsmen, greenkeepers and gardeners have been choosing Dennis, the world's best turf maintenance equipment. The reason more people trust Dennis is that, like our users, we've always refused to compromise on quality. This commitment explains why even today every part of every machine is designed and built with pride in Derbyshire, England, incorporating only the finest materials and assembled by our team of experienced engineers.

We continue to invest in state-of-the-art facilities at the Derby factory. This includes design and development, high productivity machinery, training facilities for staff and customers, the latest systems of production control with the proven know-how to ensure quality and the highest standards of service are achieved that define the Dennis difference.

At Dennis we have long understood that service and aftersales must be as superb as the equipment for customers to achieve maximum performance and first class results. Our dealers and distributors, both in the UK and overseas, are trained in installing and maintaining all Dennis products to give you first class service wherever you are.

Welcome to our catalogue. We hope you enjoy looking through our products and, if at the end you're not certain what makes our machines so different, we ask you to give one a try.

Ian Howard – Managing Director

Admired for innovation the WORLD OVER

Our team work harder to offer more support to more customers more of the time – whether at grass roots or with professional users. That’s why you’ll see our machines on the best pitches, greens and fine lawns around the world.

Solid Engineering with a unique feel...

Our reputation for innovation began in 1922 and has continued ever since. Through our ongoing development of cutting edge ideas, our expertise will help the way playing surfaces are prepared and maintained.

At Dennis every design detail makes a difference to performance. From the millimetre precision of click height adjusters to the enhanced versatility of our unique interchangeable cassette system, you can be sure engineering innovation runs through every Dennis machine.

Dennis G860

a game-changer for

Wolverhampton Wanderers FC

A new strategy devised by the owners of Wolverhampton Wanderers FC, has resulted in the club purchasing three new Dennis G860 cylinder mowers.

It's an exciting time for the West Midlands based club; when the new owners took control last year part of their strategy was to place a big emphasis on the style of football they wanted Wolves to play. As a result they were committed to investing in the surface at Molineux Stadium.

A state-of-the-art Desso Grassmaster hybrid pitch, which is used by top clubs across Europe, was installed shortly after the new owners' arrival. Secondly, it was time to look at upgrading the turf maintenance machinery.

"When the option came to invest in new machinery, we jumped at the chance of going back to Dennis," says Anthony Parker, deputy head groundsman. "Certainly for me, I've come from a private school background where I have been brought up on Dennis machines. We also used to use the Dennis Premier here on our old fibre elastic pitch. However, the Desso Grassmaster is renowned for being a bit firmer so we decided to go for the Dennis G860 when the new pitch was installed."

The Dennis G860 features an interchangeable cassette system to assist with a wide range of tasks. With a simple one-minute changeover, users have the option of fitting thirteen different types of cassettes including scarifiers, verticutters, brushes, spikers and slitters as well as six, eight or eleven bladed cutting cylinders.

"We purchased three G860's with the full range of cassettes which gives us so much versatility," says Anthony. "We use them on a daily basis. The verticutting unit is used quite regularly to clean out the surface and we really see the benefits from this. The brushes are a great option too and we use the machines at both the stadium and the training ground."

"With three mowers we now double-cut on match days and the G860's are perfect for presentation and getting a quality finish every time. They create the ideal pitch suitable for how the owners want the team to play. Dennis mowers are simply renowned for being a quality piece of kit and the equipment speaks for itself. They are really user friendly and since we've had them all of the team have been really impressed."

"The G860's are perfect for presentation and getting a quality finish every time."

"Dennis Mowers are simply renowned for being a quality piece of kit and the equipment speaks for itself."

Unrivalled performance & impressive versatility

The FT with its innovative interchangeable cassette system is unrivalled as a mower and turf maintenance machine on all areas of fine turf.

Now year round maintenance with a single power unit maximizes return on your investment keeping your machinery inventory to a minimum.

Unique features of the Dennis FT mower:

- 12 quick change cassettes to perform a wide variety of essential turf maintenance tasks
- Simple and robust click height adjustment for 0.25mm increments without tools
- Honda power – ultimate easy start long life with Q9 low noise low vibration technology
- Unique roller clutch drive for smooth take up and variable clip rate for the ultimate finish on cricket tables
- 3 section differential roller with cast segments for scuff free turning without operator fatigue
- Spring steel comb with full adjustment to tease up lateral growth prior to cutting

Positive, easy height of cut adjustment in 0.25mm increments

Low vibration mounts

Easy adjustment of bottom blade to cylinder

"If someone comes to our club and asks us how we get our green in such good condition, we show them the FT510. We tell them what we think the advantages are of using it as well as how easy it is to use."

Peter Heayns – St Austell Bowling Club

2mm scarifier tungsten tipped	D094TT	D069TT	D109TT	
The ultimate scarifier with tungsten tipped blades for heavy duty thatch removal throughout season and autumn/spring renovation work.				
Brush	D096	D071	D111	
For moss and debris removal and use as a light scarifier for final pre cut preparation.				
Brush – multi dense	D096/M	D071/M	D111/M	
For moss and debris removal and use as a light scarifier for final pre cut preparation.				
Verti-cutter	D095	D070	D110	
1mm thick, 10 fingered replaceable discs. Regular use controls thatch, lateral growth and the ingress of unwanted species such as annual meadow grass.				
Verti-cutter tungsten tipped	D095TT	D070TT	D110TT	
The ultimate verti-cutter with tungsten tipped blades for heavy duty usage.				
Sorrel roller	D098	D074	D114	
Replaceable spikes relieves surface tension and allows penetration of air, water and fertiliser to the root zone.				
Slitter	D099	D075	D115	
Helps relieve surface tension and prevents thatch.				
Spring Tine Rake	N/A	D076	D116	
Ideal for lifting lateral growth, helping to stand grasses up, removing dead matter or broken leaves following a match. Also helps to break up algae crust or help remove the glutinous slime that can sometimes appear on fine turf.				

Dennis was the original manufacturer of the interchangeable cassette system and has many years experience supplying:

- In excess of 4000 machines to the grounds care industry
- A system that once purchased, can be enhanced with additional cassettes as budget allows
- Maximum machine versatility
- Single power unit optimisation
- Easy to clean cassettes
- A system designed to meet the needs of the professional whether full time grounds men, greenkeepers or club volunteers

The system allows:

- Cassettes to be changed over in approximately 30 seconds
- Minimal inventory
- Cassettes to be stored separately from the power unit providing improved security
- Reduced maintenance costs
- Easy transportation of the cassettes for servicing or grinding
- All wearing parts can be replaced

Optional Cassette Stand

Storage unit suitable for 5 cassettes

How To Change A Cassette

Loosen retaining bolt and slide cassette across

Extract cassette

Insert new cassette onto front unit bearing stud

Lower cassette onto back tie bar and slide cassette across

Tighten retaining bolt

"I visited other clubs and spoke with other greenkeepers. It was apparent that practically all of the clubs used the FT510. It was simply the best and most sensible option: so we bought two of them."

Derek Turner – Liskeard Bowling Club

Razor Ultra

Superbly balanced mower that's easy to manoeuvre

The Razor Ultra has been developed to specifically meet the demands of golf greens & tees, cricket pitches and bowling greens.

Bowls/Croquet/Tennis

Cricket

Golf

Amenity

OPTIONAL LOOP
HANDLE AVAILABLE

With an 11 bladed cutting cylinder giving an ultra fine finish, the machine incorporates many new key features such as an ultra short wheelbase for undulating greens, a tungsten tipped groomer which can be in or out dependant on the conditions, to cut lateral grasses prior to cutting, the simple 'no tools required' click height adjuster and the low noise, low vibration Honda Q9 engine. Also available with 7 bladed cutting cylinder.

Unique features of the Dennis Razor Ultra mower:

- 11 bladed British made cylinder, relief ground for quality cut and long inter grind intervals
- Heavy duty independent cutter and roller clutches for smooth take up
- Powerful tungsten tipped groomer for lateral growth control
- Ultra short wheelbase for undulating greens
- Simple and positive height of cut adjustment with 'click adjust'
- Weile roller as standard for that perfect cut
- 2 section cast aluminium rear roller with steel geared differential

Simple to operate groomer drive engagement

No external stub shafts

- High impact resistant acrylic guards
- No more stub axles – quick release transport wheel kit c/w kick stand
- Easy 'pull back' for accurate alignment of next run
- Honda power – ultimate easy start long life engine with Q9 low noise low vibration technology

“The best mower we have ever had. It’s very well built, easy to swap cassettes and been really reliable for the 12 years we have had it”

Tony Harman – Private customer

G660, G760 and G860

Superior construction you can trust everyday

This popular machine is to be found at many of the best football and rugby stadia, racecourse parade rings, athletics tracks and on the lawns of many famous houses across the country, and now around the world.

Features include the quick change cassette system giving ultimate flexibility and a single power unit solution for many day to day maintenance tasks such as scarifying, verti-cutting and brushing.

This versatility coupled with low ground pressure and manoeuvrability makes the machine the first choice for a wide range of conventional and modern sand based turf construction systems.

Unique features of the Dennis G-Series mower:

- Open construction means superior sight lines for accurate line up of mower
- Cast 3 section aluminium ribbed roller for positive traction in all conditions and mark free turning
- Rubber covered rear roller option
- Low vibration handlebars
- Large diameter front roller with adjustable scraper for precision height of cut control
- Grooved Weile roller with comb now an option
- Honda power – ultimate easy start long life engine with Q9 low noise low vibration technology
- 13 quick change cassette options

Easy and comfortable to operate controls incorporating parking brake and all the latest safety features

Adjustment of cylinder to bottom blade easy and positive with a single spanner

Precise height of cut control which easily adjusts on both sides with a single spanner

PRO 34R

A masterpiece delivering a first-class finish

The PRO 34R is a 34" (860mm) rotary mower designed to help groundsmen achieve an aesthetically pleasing appearance and desired playing surface.

Football

Rugby

Cricket

Lawns

Amenity

A professional rotary mower which has been designed and developed with feedback from groundsmen.

The mower is ideal for sports pitches and lawns producing the enviable 'Dennis Stripes' whilst a powerful vacuum flow collects debris quickly and efficiently. The angle of the cutting deck and twin blades can be easily adjusted using a single 'click adjuster' ensuring the mower is suitable for changing conditions and meeting a groundsmen's requirements.

Unique features of the Dennis PRO 34R Rotary mower:

- 5 forward and 1 reverse selection for speed of operation
- 90 litre capacity grass box
- Fully adjustable angle of deck for changing conditions
- 2 section cast aluminium rear roller
- Easy to use height of cut gauge
- Single point height of cut adjustment for ease of operation
- Optional front wheel or smooth/weile roller
- Front brush for standing grasses upright
- Adjustable handlebars for operator comfort

5 forward and 1 reverse selection for speed of operation

Easy to remove 90 litre capacity grass box

Easy and comfortable to operate controls

Simple 'click adjustment' for angle of deck

PRO 34R MODEL CHOICE

FULL SPECIFICATION AVAILABLE ON www.dennisuk.com

Verticut TT

Keeping grass in excellent condition

This dedicated machine brings professional verti-cutting to every facility.

Bowls/Croquet/Tennis

Cricket

Golf

Lawns

Amenity

Regular verti-cutting has great benefits to turf performance, reducing the thatch layer, improving the sward and encouraging finer grasses to flourish. This encourages healthy growth and increased ball speed in all surfaces especially golf and bowls.

This increased speed allows mowing at higher clip heights keeping more leaf on the green – the source of nutrient collection. Ideal for golf greens, bowls, cricket and ornamental lawns.

Unique features of the Dennis Verticut TT:

- Honda power – ultimate easy start long life engine with Q9 low noise low vibration technology
- Ultimate easy start and simple operating system
- Hi comfort handlebars
- Cast ribbed or smooth aluminium rear roller is in 2 pieces with all steel differential for long life and easy turning
- Excellent sight lines for operational purpose
- Slow uptake clutch system for smooth take off
- Strong, modular construction with high capacity grassbox
- Easy height of operation control with a single point of adjustment
- Easily replaceable tungsten tipped blades

“I use the Verticut TT at 15 bowling greens across western Scotland. Faster greens is the result. I’ve hired it out to friends and they’ve been impressed too.”

Derek Logue – Derek Logue Groundcare

The ultimate verti-cutter with tungsten tipped blades

Simple tool free height of operation adjustment

Low vibration handlebar mounts for safe, comfortable operation

VERTICUT TT MODEL

D130

Cutting width	510mm (20")
Engine	Honda GX160

Golf

Lawns

Amenity

With the spiker reel fitted, this easy to use machine surface aerates the turf, punching through that 'surface pan' allowing air, water and fertiliser to penetrate to the root zone resulting in a healthier sward. The 3mm x 20mm wide slots give a massive 3% of holes on any green.

The slotter head creates ideal seed germination pockets reducing seed wastage and improving the chances of survival. With the optional seed box attachment, grass seed is dropped onto the ground at the prescribed rate and brushed into the pockets enabling mowing and playing to continue without compromising the seeds chances.

Unique features of the Dennis S500 PLUS:

- Honda power – ultimate easy start long life engine with Q9 low noise low vibration technology
- Large diameter spiker reel for maximum penetration
- Fully replaceable wearing parts
- Simple operation and slow uptake clutch system for smooth take off
- Easy to manoeuvre into and out of corners
- Easy to change over reels – under 1 minute changeover
- Only 90 minutes to spike/slot and seed the average size green (45m x 45m)
- Easy to clean reels
- Spiker reel creates 3% of holes – that's 50m² per average bowling green
- Simple ground driven seeder box option

"The S500 PLUS does everything we expected it to do, it is very easy to use, simple and straightforward to set up. The reality is that when you use it – it's a pleasurable machine to operate."

Andrew Myson – Trinity Hall, Cambridge

Bray Hand Tools

Maximising and restoring turf condition

Ideal for overseeding and aerating small areas on bowling greens, tennis courts, golf greens, tees and ornamental lawns.

The seed slotter creates the ideal pocket for seed germination, maximising survival and strengthening root structure. Play and mowing can continue uninterrupted. The spiker reel is ideal for small area aeration where compaction is a problem, allowing ingress of air, water and nutrients.

Unique features:

- Interchangeable heads between slotter and spiker
- 50% saving of grass seed when overseeding using slotter
- Rapid germination and stronger growth
- No loss of play and no top dressing required
- Simple to store and maintain

This information is intended for guidance purposes only. We recommend that you discuss your specific requirement with our head office, Sales Managers or your local Dennis dealer. This guide is subject to machine specification change. At Dennis we are always seeking to improve our products. For the latest information on vibration and noise emissions please visit www.dennisuk.com in the manuals section.

Gaining knowledge from the experts

The Dennis and SISIS education seminars are popular events hosted at clubs and facilities across the UK and overseas. Attending delegates receive a wealth of practical and theoretical insight from our carefully chosen expert speakers and the seminars represent a unique opportunity to share knowledge, experience and best practice.

Seminar programs focus on specific sports surfaces. A wide range of topics are covered including machinery maintenance, fertilizers, top dressing, seeds and disease. The Q&A sessions at the end of the day gives everyone an opportunity to ask their questions.

"I have learned a lot today. From the first speaker talking about cores and looking at the square, and then moving outside and seeing all of the machinery and going into great detail about all the renovation work – it's just been fantastic. There are things that I've heard and seen today that will ultimately improve the quality of my work and improve the quality of the squares."

Eric Woodmason – Clubs and Programmes Officer for Gloucestershire Cricket Board

**Contact Marketing on 01332 824777
for details of our next series of seminars**

"90 years of experience have taught us many things – including that you don't get to be the best overnight. Like the world class sportsmen who play on Dennis maintained pitches demonstrate, it takes skill, dedication and a willingness to learn to reach and stay at the top of the game."

A helping hand from Team Dennis

Access to all the information you need

The Dennis website is a constantly evolving source of useful and practical information for Dennis users. You can watch videos of machines

in action, learn valuable tips about turf maintenance and download operating manuals on all Dennis products at your convenience – any time, any day.

Experience our excellent network of dealers

The dealerships that represent Dennis products are carefully selected to ensure customers receive first class professional support including

machine service, spare parts, technical support and product demonstrations. Whatever you need, our dealers will always be there to help.

Next day spare parts

At Dennis we understand the importance of reducing machine downtime so we carry a vast stock of spare parts, all of which can be dispatched next day delivery through our specialist dealer network.

In addition, our online resource of operator manuals now makes it even easier to identify the correct part number.

We keep good company

Dennis supports industry associations through corporate membership, which include:
