

Lloyd Ltd. NEWCASTLE and BISHOP AUCKLAND

Your local professional groundcare machinery specialists.

Representing many of the leading manufacturers of professional groundcare machinery, at Lloyd Ltd we are here to help you find the right equipment for your needs. From estate management to sports fields, gardening contractors to local councils, our wide range of quality products, flexible funding solutions and expert aftersales service provide the ideal support for our customers whatever their groundcare needs.

This brochure showcases some of the many products we can offer, so if you would like more information on any of these products or ones to meet other groundcare needs, please contact your local Lloyd Ltd Groundcare Sales Specialists.

TORO Greensmaster Mowers 3400, 3420 TriFlex

The all-new TORO Greensmaster TriFlex mowers were designed to take precision cutting to a completely new level. Adopting the proven Flex suspension, the cutting units float freely over contours and undulations of the green resulting in a superior quality of cut and aftercut appearance. Improved serviceability is another major advantage of the new TriFlex models. The tool-free, quick-change cutting units make servicing fast and easy, and a lift-gate footrest provides easy access to the centre cutting unit.

The suspension system maintains full floatation range to prevent gouging or scalping when going over undulations. Superior contour-following capability utilises an integrated "Flex" linkage system to allow cutting units to pivot around the centre of the front roller to master undulations and prevent side-to-side scrubbing of the putting surface. The suspension system is designed to provide a slight lift to the inside of the cutting units during turns to deliver a consistently level cut and to reduce "triplex ring" for improved playability and turf health.

Tool-free, quick-change cutting units.

TORO Reelmaster Mowers 3575, 5010-H and 5510

The Reelmaster 5610 is designed to deliver the performance you've come to expect from TORO. Built to handle the heavy work-load pass after pass and year after year, the turbo engines provide the muscle to get the job done with power to spare. The 5610 comes with the larger 7-inch/178mm diameter 8- or 11-blade cutting units as standard. Available in standard two-wheel-drive or add on the CrossTrax all-wheel-drive system.

Precision-machined cutting units maintain levelness and hold adjustments. Dual Precision Adjustment (DPA) allows quick bedknife to reel adjustment. Harder reel and bedknife steel retain a sharp edge up to three times longer to minimise the need for and frequency of adjustments, backlapping and grinding, leading to healthier turf that stays green.

Reelmasters can be configured to meet all mowing applications.

TORO Groundsmaster Rough Mowers 4300/4500/4700

Is wider better?

That's like asking if more productivity is better. The Groundsmasters with the Smart Power feature answer with a resounding yes, in the form of an awe-inspiring 381cm/12.5-foot width of cut, powered by a 55Hp/41.1kW turbo-diesel Yanmar engine that lets you mow up to 8.9 acres per hour/3.6 ha/hr.

Add in floating Contour Plus cutting units, full-time bi-directional four-wheel drive and the innovative Smart Cool™ system, and you have productivity and performance no other mowers can touch.

Want to raise operator productivity?

Put your operators in control of their own comfort.

Start with a TORO Air Ride seat and armrests that adjust for individual preferences, a steering tower that quickly tilts for optimum fit, and electronic controls that are easy to access from the seat arm. Throw in plenty of storage space behind the seat, and your operators will be ready to go the distance.

Groundsmasters deliver unsurpassed performance and value.

TORO TORO Workman HDX-4WD

The Workman® HDX 4WD vehicle provides total payload capacity of 2,835lbs. (1,289kg). The automatic, on-demand, bi-directional four-wheel-drive traction system provides additional traction when needed without operator action. Independent front suspension consisting of two double A-frames with opposing dual coil springs and dual shock absorbers provides 5.75in. (14.6 cm) of front suspension travel.

Rear suspension design consists of a DeDion rear axle and dual independent leaf springs and shock absorbers to provide 3in. (7.6cm) of rear travel. Benefits include operator comfort, safety, reduced operator fatigue, productivity and efficiency gains.

The Workman can perform a variety of work tasks beyond hauling and towing with attachments such as a 200-gallon (757-litre) Sprayer, Vicon Spreader, 1/3 Vertical Platform Lift, Patriot Aerial Lift and Topdressers.

Numerous accessories enhance versatility including canopy, folding windshield, various light kits, deluxe hard cab, various flatbeds, four-post ROPS, automatic tailgate release, rear PTO and others.

Providing durability, excellent driving performance and versatility.

TORO TORO ProPass 200 and MH400

The TORO ProPass 200 broadcast-style topdresser delivers extremely accurate spread patterns from ultra-light dustings to ultra-heavy aeration hole filling applications without any guesswork. A wireless controller provides the easiest method to set and control the spread functions. Available in both a utility vehicle-mounted version and a towed version.

Series Models:

ProPass 200 - Bed-Mounted or Tow-Behind

ProPass 200 - Bed-Mounted or Tow-Behind with Wireless Controller

The new **Toro MH-400** delivers high performance and versatility to tackle a wide array of jobs at any facility. The wireless controller provides the easiest method to set and control the spread functions. Choose one or both of the cross conveyor and twin spinner to help you reduce labour, save time and cut operating costs.

Accurate and versatile.

TORO TORO ProCore 648

From the innovative wheels within the coring path to the large 122cm/48-inch aeration swath, there's nothing ordinary about the ProCore 648 aerator.

Years of research, customer input, testing and attention-to-detail went into making the ProCore 648 the most productive and efficient walking aerator on the market.

The ProCore 648 allows you to aerate more areas in one day with the 122cm/48-inch aerating swath and clean-up is easier and less labour-intensive resulting in less time.

To give the ProCore 648 its uncommonly smooth operation, the action of the tine arms is modelled on a six-cylinder car engine. The arms work in pairs to counterbalance the coring action. This precise configuration virtually eliminates hopping, rocking and unnecessary vibration.

Higher productivity while easy and safe to operate.

TORO Groundsmaster Wide-Area Mower 4000

The Groundsmaster 4000-D is the strongest most productive 11' (3.4m) mower available today. With the Kubota turbo-charged, 58hp (43.3kw), diesel engine you can quickly mow through a variety of cutting conditions. The 4000-D has the rare ability to mow a zero-degree uncut circle without the use of wheel brakes.

In addition to effectively mowing a 62" to 11' (157.5cm to 3.4m) swath with its fast wing lifts, the Groundsmaster 4000-D/4010-D offers incredibly tight trimming capabilities. It allows you to trim how you want with one, two, or all three decks engaged, depending on the situation.

The 4000-D/4010-D also features a unique, patent-pending, parallel hydraulic traction system in forward and reverse that makes it much easier to trim around a tree or object without scuffing even while traversing a hill.

The impressive trimming capability means you can get around even the smallest object. The rare ability to mow a 0° uncut circle - without wheel brakes - allows you to easily mow striping patterns without leaving any grass uncut.

Smooth turning is made possible by a tight 55.5" (141cm) wheelbase and an inner, rear-steering turning angle of 53.5 degrees

The strongest most productive 3.4m mower available today.

TORO Commercial Triple Flail Mower LT-F3000

The NEW Triple Flail Mower LT-F3000 is a true game changer.

Designed to meet the challenges presented by restricted budgets, and increasing demands of maintaining both short and long grass, the LT-F3000 delivers superior productivity, lower operating costs, easy servicing and maximum usability. This unique machine is the ideal choice for you to increase the length of time between cuts whilst retaining a premium finish. It has been specifically designed to save you both time and money.

The robust design and impressive durability ensure it is a machine you can always rely on. Easy to clean, maintain and service, offering greater ground contour following and simple operation, the LT-F3000 can be used in all groundcare environments.

Parklands, playing fields, roadside verges, housing estates and schools are just some of the areas it can tackle.

If you need to increase productivity, work within budget constraints and retain high-levels of versatility, the LT-F3000 is now the only serious choice.

Specifically designed to save you time and money.

TORO High Output 5-Unit Mower T4240

The T4240 is a high output mower able to compete with tractor-drawn gangmowers in large open areas, yet has the versatility to be used in confined spaces as either a triple, or a five unit machine. Excellent all-round visibility from the seating position allows cutting up to obstacles and helps ensure a safer operation.

The T4240 has two switchable modes (road/work) to suit the different traction requirements for grass surfaces and for road surfaces.

Road mode gives a gentle four-wheel drive traction which minimises tyre wear and is suitable for road surfaces.

Work mode gives superior four-wheel drive traction for loose or soft surfaces and also enables the use of the hydraulic differential lock for traction in extreme conditions.

The option of a fully-glazed all-weather ROPS certified cab, gives maximum visibility and a safe comfortable working environment in all weathers.

High output, versatile mower for open or confined spaces.

TORO Commercial Triple Reel Mower CT2240

The New CT2240 compact reel mower provides the ideal solution to mowing operations in areas of restricted access and limited manoeuvrability.

Featuring a narrow 138cm transport width, the CT is ideally suited where narrow access, gates and bollards prove to be an issue. With a cutting width of 212cm and independent cutter head lift, productivity remains at its optimum.

The four-wheel-drive configuration is standard, and the CT2240 comes equipped with a lower-height ROPS frame reducing machine height to 212cm.

The new design features improved cutter units and transmission performance. It is equipped with the proven Mk3 200mm cutting units in numerous blade configurations, providing flexibility to suit the mowing environment.

Optional LSDL (Limited Slip Differential Lock) and full weather cab are available.

The ideal solution for restricted areas or limited manoeuvrability.

TORO Commercial Triple Reel Mower LT3340

Building on a long-standing legacy, the high-quality design and robust heavy-duty construction will meet the most demanding of environments whilst the range of high-performance, commercial specification cutting units – offered in two different diameters and with numerous blade configurations – will provide the perfect finish every time.

From light trimming to mowing dense, overgrown areas, the LT3340 can be tailored to suit your mowing application.

Available in two cutting diameters, the proven and reliable Mk.3 cutting unit ensures a perfect finish and distribution whilst withstanding the rigours of a commercial application.

The 200mm unit is available with a choice of either 4, 6, 8 or 10 blades and is suited to finer applications such as sports/playing fields and school grounds.

Available with a floating head option, they offer the ideal solution for terrain where excellent contour following is essential – without compromising the after-cut appearance.

For light trimming to mowing dense, overgrown areas.

TORO Groundsmaster Zero-Turn Mower 7210

The Groundsmaster 7210 is a zero-turn rotary mower rugged enough to be called a Groundsmaster. Powerful Kubota 35hp (26kw), 3-cylinder, liquid-cooled turbo diesel engines get the job done well. Durable heavy-duty 7-gauge welded deck construction and the industry's toughest spindle assembly provide long life. Use the Groundsmaster 7210 for more than mowing with the added versatility for removing snow, grooming infields and blowing leaves.

Groundsmaster 7210 Models can be configured with one of the following decks:

- 183cm side discharge (model 30363),
- 183cm base deck (model 30464) which can be set up as either a rear discharge deck or Guardian Recycler deck,
- 152cm side discharge deck (model 30468),
- or
- 158cm base deck (model 30465) which can be set up as either a rear discharge deck or Guardian Recycler deck.

For mowing, snow removal, grooming fields and blowing leaves.

KUBOTA Compact Tractors BX/B/STW Series

Ideal for a multitude of tasks from implement and trailer work to mowing, spraying and front loader work, B-Series compact tractors feature a hydraulic independent PTO system and fully hydrostatic power-steering for optimum efficiency and ease of use. Selectable four-wheel-drive comes as standard across the range, with cruise control fitted to all HST models, promoting both operator comfort and productivity.

The B30 Series offers outstanding agility, with all models featuring Kubota's hydraulic bi-speed turn to reduce dramatically turf damage and enable even tighter turning circles.

Boasting Kubota's innovative ETVCs engine technology, the B30 Series emits fewer harmful pollutants and is exceptionally fuel-efficient.

The B30 Series' impressive ergonomic design ensures smooth operation, reducing your workload and improving efficiency.

The first machine in its class to offer an air-conditioned cab, the B30 Series' factory cab has been designed to be conducive to efficient use, providing the driver with the comfort, visibility and ease of use required for daily operation.

The first machine in its class to offer an air-conditioned cab.

KUBOTA Mid-Range Tractors L-Series

From maintaining your property to commercial landscaping and small farm operations, the Kubota mid-sized L-Series tractor range offers powerful performance, outstanding versatility and exceptional economy year round.

Well known for their reliability and fully backed by Lloyd Ltd's service support network, you are in capable hands with an L-Series tractor, providing you with years of dependable and problem-free use.

Available with performance-matched front loader, backhoe and a variety of attachments to suit every application.

Consistent performance for economical year-round working.

KUBOTA Out-Front Ride-On Mower F3890

Built for the heaviest of workloads and even the most demanding of jobs are made effortless with the Kubota F3890 mower. With a 38hp engine, the F3890 Mower is the most powerful outfront mower in the Kubota range.

The F3890 Mower is ideal for mowing large areas quickly and with four-wheel-drive as standard the F3890 can handle slopes and slippery conditions while other two-wheel-drive machines would struggle.

The F3890 is meticulously designed for varied and demanding day-long commercial mowing operations.

Robust, highly manoeuvrable and extremely versatile, the F3890 delivers exceptional performance and is ideal for a wide range of applications. Advanced features ensure maintenance is quick and easy - a tilt-up hood, easy-to-clean integrated radiator screen and a dual element air filter, maintenance couldn't be simpler.

Kubota's unique deck suspension and weight transfer system ensure the mower blades are kept in perfect alignment with the ground.

The most powerful out-front Kubota mower.

KUBOTA Ride-On Mower GR1600-II

The GR1600-II is an extremely comfortable machine to operate and work in. With a full-flat deck allowing for more legroom and an Easy Checker dashboard that provides you with the important information clearly and precisely, Kubota have taken care to ensure the operator's needs are taken care of with this machine.

There is a large 18-litre fuel tank requiring fewer stops for refuelling, while the engine itself requires no special maintenance during the off-season. Hydrostatic transmission makes the GR1600-II easily controllable with a single foot pedal and allows for a maximum travel speed of 10km/h.

With a high performance 42-inch mower deck based on the design of Kubota's professional-grade machines but with user-friendly operation, impressive commercial-grade results are within your reach.

The grass collector is a generous 370 litres and can be dumped with a light touch, as well as removed and replaced with an optional rear deflector.

An electronic sensor signals when the collector needs to be emptied.

High-performance features to leave you with a beautiful lawn.

KUBOTA Ride-On Mower GR2120-II

The semi-professional Kubota GR2120 tractor is a 21hp, three-cylinder diesel engine machine boasting a number of performance-enhancing features over the smaller GR1600. Designed for home and estate owners who require a diesel tractor capable of handling a wider and more demanding range of grass cutting conditions.

All-wheel drive for outstanding traction across all surfaces, wet and dry, together with enhanced safety on slopes. These tractors also have Kubota's revolutionary Glide Steer system which cuts power automatically to the inside rear wheel when the turning angle reaches 70 degrees.

The extremely tight turning circle provided by Glide Steer on full lock produces an uncut circle of grass measuring just 110cm, a very impressive figure for a machine with four driven wheels.

Other features unique to the semi-professional GR2120 include a 1.22m (48") width of cut from three rotating blades, a hydraulically-powered deck lift, power steering, a 450-litre capacity grass collector and suspension seat.

Manoeuvrable and powerful.

KUBOTA Ride-On Mowers G-Series

Enhanced with power, precision and agility, the tough G-Series puts professional results within easy reach. Boasting a 20.5-litre fuel tank, the G26 II, with its 25.5hp Kubota 3-cylinder ETVCS water-cooled diesel engine, offers exceptional power and efficiency for day-long mowing operations.

The G26 II comes with a 137cm/54inch cutting width and the 150mm/6inch maximum lift height gives excellent ground clearance for climbing obstacles such as curbs.

Standard features include easy-to-use HST transmission, a top speed of 17kph, as well as full hydrostatic power steering, thus reducing operator fatigue.

The G26 II is equipped with differential lock, cruise control, a heavy-duty front axle and hydraulic PTO, which allow the machine to work longer but not harder.

For added operator comfort and convenience, the G26 II incorporates a high-back suspension seat.

High tip available.

Exceptional power and efficiency for day-long mowing.

NEW HOLLAND Boomer 25/30/35/40/50

New Holland's Boomer Compact Tractors are the ultimate power tools for horticulture and agriculture applications, homeowners, rural lifestyle, landscapers, golf courses, municipal applications and hobby farmers.

Responsive, efficient and comfortable, they're built to make your jobs easier. Available in six models, with power output from 23 to 47hp, Boomer tractors give you big-tractor reliability wrapped in a compact, manoeuvrable package. They're loaded with features that keep you comfortable while saving you time and money.

Whether you need to mow the lawn, top a paddock, dig a drain, cultivate the garden, clean a stable yard or install a fence, Boomer tractors are for you.

These tractors make it easy to change implements so you can move quickly from job to job.

All models offer Independent, Electro hydraulic 540rpm rear PTO and Category-1 three-point hitch.

Easy to use and highly efficient.

NEW HOLLAND T4 Powerstar Series Tractor

The upgraded three-model T4 PowerStar range has been designed to take operator comfort to a whole new level.

With 58hp to 75hp(CV) on tap, even the most demanding users will be able to sit back and relax in this, a truly New Holland tractor. Fully compliant with the even more stringent Tier-4B emissions regulations, you can save fuel and improve performance with efficient Common Rail engines.

From distinctive styling to responsive performance, the T4 PowerStar is a key member of your machinery family.

If you are looking for a tractor that offers you outstanding productivity in a compact package, then the T4 PowerStar is the natural choice.

Advanced Common Rail engines deliver precise fuelling for unbeatable responsive performance and improved fuel efficiency. The range's power curve is flat between 1900 and 2100rpm for sustained power during demanding operations. An outstanding power-to-weight ratio of a mere 30.4kg/hp(CV), further enhances fuel economy. Performance. Guaranteed.

Outstanding productivity in a compact package.

NEW HOLLAND T5 Utility Tractor

The T5 range has been designed to be the ultimate all-rounder. New Holland listened and drew on the T5000 range's heritage and updated it. Whether it is doing loader work, working with front or rear-mounted implements or travelling down the road, the T5 delivers premium features in a compact package.

A multitude of customisable options from transmissions to engines, when combined with engine speed management and best-in-class fuel consumption, make the T5 a winning package. Equipped with a Tier 4A-compliant FPT Industrial F5C engine, the T5 delivers efficient power when required.

The entry-level 12x12 Synchro Shuttle transmission offers traditional robust operation with positive direction changes. The 12x12 Hydraulic Powershuttle delivers ergonomic fingertip direction changes without letting go of the steering wheel. The Split Command transmission is the choice for operators who need to fine-tune speed to adjust it for every operation. The new 24x24 Dual Command transmission features a Hi-Lo Splitter powershift that delivers outstanding efficiency and a tailored shuttling performance.

Designed to be the ultimate all-rounder.

ETESIA Pro 46 Evolution, Duocut 46 & 53, Pro 53 & Biocut 53

Pro 53

Our range of Etesia pedestrian mowers.

ETESIA Pro 46 Evolution PKCTM

The new Pro 46 professional mower is extremely versatile and is capable of mowing with or without collection in all conditions, or allowing high-quality mulching.

The new ETESIA Duocut 46 and 53 family of three-in-one mowers

The new Duocut mowers are extremely versatile and are capable of mowing with or without collection in all conditions, or allowing high-quality mulching. And they do all that with no need for an accessory.

ETESIA Pro 53

The unique transmission with two hydraulic engines offers you great handling and slope performance unrivalled in its category. The innovative mowing deck and blade design on the Pro53 combines professional quality cutting, collecting and mulching in a single machine.

ETESIA Biocut 53

Efficient even in long grass, the powerful, high-performance mower Biocut 53 ensures a quick, clean, environmentally-friendly cut. The mulching cover can be removed to convert the Biocut 53 into a highly-efficient mower for tall and wet grass.

Biocut 53

Mow with or without collection in all conditions.

ETESIA Buffalo BPHP and Hydro H124/H144

Buffalo

Buffalo: The New Force!

Fitted with a 100cm overlapping cutting deck and a 20hp three-cylinder diesel engine, it has a higher hourly mowing output of up to 12,000m² per hour, and an unequalled power-to-weight ratio. Above all, it represents excellent value for money, both for the initial purchase and for use. The efficiency of the cutting system of the new Buffalo 100 allows professionals to work faster (up to 12km/h in optimal mowing conditions) and to improve productivity and output on wet grass, or in the rain. The Buffalo 100 ride-on mower is fitted with a built-in grass collector with a capacity of 600 litres, and the hydraulic emptying system is controlled from the driver's seat.

Hydro: A World Apart

The Hydro 124D is the first mower that combines direct rear-ejection, integrated collection and high-lift emptying (patented). All features that make it one of the most highly efficient machines on the market, designed to mow up to 19,000m² per hour. H124B is a Bio version, using B30 petrol (30% ester of biomass and 70% diesel) and biodegradable oils and greases. Cutting deck with rear ejection to give a quality finish with excellent collection even in long and wet grass. Grass capacity: 600/100kg.

Hydro

Mow up to 19,000m² per hour.

PELLENC Petrol performance ...without the petrol

Thanks to its strategy of innovation, and after many years of research, Pellenc has replaced the 'old' combustion engines with a brand-new electrical technology which combines an electric motor and a revolutionary battery.

The patented electric motors, with an unrivalled power-to-weight ratio, develop an extraordinary power output with unequalled durability. Combined with the ultra-high-capacity lithium-ion batteries, professionals can work much better than with the old combustion-engine tools, in particularly optimum conditions.

Light, odourless, noise-free, with no starting problems and no filling the fuel tank, your old petrol chainsaw, hedge trimmer or brush cutter will seem to belong to the past. Pellenc has overtaken most of the manufacturers of tools for maintenance of parks and gardens thanks to the innovations of its Research and Development department.

You contribute to reducing the consumption of fossil fuels whilst increasing your productivity and cost effectiveness. This is the whole paradox, but also the strength of Pellenc's products: you are more active towards the environment while improving the working conditions and reducing your expenses.

In fact, the energy cost proposed by Pellenc is fifty times less than the cost usually noted with combustion-engine tools. The company has already won several medals, but they consider their best reward to be the enthusiasm of their customers. Pellenc already provides you with all the advantages that you could never imagine.

Committed to the environment.

GKB Maintenance Machines for Sport Pitches

Combinator

Infill Remover

Ecodresser

Sandspreader

GKB Machines is part of the GKB Group. Since 1985, GKB Machines, as a separate division, has engaged with the development of innovative maintenance machines for sports pitches. As a family-owned company GKB Machines feels strongly about sustainability. That they do not just stick to words is evident from the fact that they are producing their machines as energy-neutral.

The GKB range of groundcare machines includes:

Combinator - Do your natural grass sport pitches not meet your requirements? With the Combinator you are in possession of a multi-functional fraise mowing machine. You can use the CombiRotor with three types of blades or chisels.

The **Infill Remover** works with an unique brush, which is adjustable in stiffness. In this way it is possible to work on both new pitches as well as on heavily-compacted ones. Dependent on the pitch, it is possible to remove the complete layer of infill in one operation.

The **Sandspreader** has been developed and produced in their Dutch, energy-neutral industrial plant. All materials used are of premium quality. Take for example the S355 MC steel and Bucher hydraulics. The choice of these derives from the experience of their contractor division. Their machines can take a few knocks!

With the **Ecodresser** you are in possession of the ultimate machine for the maintenance of sports pitches or golf courses. Multiple operations are combined in one. The turf is intensively aerated (20cm deep). At the same time as the dressing is applied to the upper layer, the sub layer is aerated.

Sustainable machines with a positive future.

Tractor/Truck-Mounted Sprayers

The StarGreen range covers 200/300/400/600/800-litre mounted sprayers, and 450 and 700-litre truck-mounted sprayers with a choice of 6/8/10-metre booms.

The entry-level StarGreen AS200 still has the build quality, finish and high specification components found on the larger sprayers within the range. With manual controls as standard and a 200-litre tank it is ideal for spraying small areas in and around a golf course, sports turf and amenity areas.

The StarGreen AS300 Pro and AS400 Pro are popular compact tractor-mounted sprayers designed for the professional user, who will regularly spray sports and amenity turf.

As standard they are supplied with a top specification three-cylinder diaphragm pump to ensure the best possible spray pattern.

The largest sprayers in the AS tractor-mounted range, StarGreen's AS600 Pro and AS800 Pro - 600 and 800-litre Tractor-Mounted Amenity Sprayers - are for users who have large areas to maintain and want to work as efficiently as possible.

The StarGreen DM450 Pro & DM700 Pro - 450 and 700-Litre Utility Vehicle Demount Amenity Sprayers - are designed for use with Toro Workman-type vehicles, so the sprayers are attached using the existing pin points and ram mount, which makes the sprayer easy and quick to mount and dis-mount.

Efficient weed control.

GROUNDSMAN TMC46 Turf Cutter

The GROUNDSMAN TMC46 turf cutter is right at the leading edge of turf cutting technology and supercedes GROUNDSMAN'S highly successful model TCDRB34. The TMC46 is a four-wheel-drive, high performance, precision sod cutter with the ability to cut very thin accurate fine turf or very thick in the rough. It has a host of features that set it apart from any other turf cutter.

- Safe and easy to operate
- Low operator handle vibration levels
- Effortless precision cutting in all conditions
- Four-wheel-drive
- Durable with very low maintenance

SNOWEX Vehicle-Mounted Gritter SP1575

Versatile SnowEx utility spreaders can be used in a variety of applications thanks to the wide range of mounting brackets available to suit 4x4s, utility vehicles, tractors, forklifts, or even a trailer mount for use behind an ATV.

Ideal for councils, contractors, farmers and private estate owners, the SnowEx utility spreaders are simple to operate, give excellent performance and offer top value-for-money.

The Husqvarna GX560 is a petrol-powered hover mower, designed to combine the manoeuvrability of a hover mower with the convenient mobility of a petrol one. While its petrol engine means it is by no means the lightest hover mower on the market, the GX560 is light enough to perform effectively, gliding on a cushion of air over slopes and uneven surfaces that a wheeled machine would be unable to tackle.

The P525D is the most powerful and versatile commercial ride-on mower in the Husqvarna range. Suitable for all-year-round use, a wide range of attachments is available for this front-mounted mower enabling it to clear leaves, snow or extra-long grass, making it an extremely versatile machine for any professional groundcare company's fleet. Highly manoeuvrable and easy to use, the P525D's All-Wheel-Drive system enables it to tackle slopes with ease. Because all four of its wheels rotate individually, it increases the traction and stability on slopes with minimum turf damage. Fitted with a hydraulic lift to assist the operator in finding the service position with ease, the operator can perform routine maintenance and cleaning, and can change the front decked mower attachments without the use of tools.

POWER TOOLS

Chainsaws, Trimmers, Strimmers and Blow/Vacuums

Husqvarna ECHO

Husqvarna's range of petrol, battery and electric chainsaws is ideal for domestic up to heavy-duty professional use. They deliver lower fuel consumption and reduced exhaust emission levels in accordance with environmental regulations.

Husqvarna ECHO

The ECHO range of twin-blade hedge cutters features low vibration technology and rotational handles for manoeuvrability and comfort. They are equipped with powerful engines and Easy Start technology for almost effortless starting. For added safety, throttle lock-out prevents accidental throttle engagement.

Husqvarna ECHO

ECHO's 25.4cc brushcutters are ideal for light commercial use. They start effortlessly thanks to the Easy Start system. Equipped with high torque heads, these brushcutters have the same cutting power as higher capacity, heavier machines. Available with loop or bike-style handles.

Husqvarna ECHO

The PB-770 is ECHO's largest and most powerful backpack blower. It features a 63.3cc two-stroke engine and comes with a spring-mounted vibration isolation system and ergonomic backpack frame for enhanced operator comfort.

Efficient and effective power equipment.

The Park Pro 540 IX 4WD is fitted with a twin-cylinder Honda GXV 660 engine with a displacement of 688cc and can produce 14.7kw. This engine will power the full range of Stiga cutter decks with manual or electric height-adjustment control. The high-spec transmission system has a separate 10 litres-per-minute hydraulic pump delivering a full speed of 11km/h through the heavy-duty Kanzaki transaxles to the large 17" front and rear wheels.

The PTO clutch is electro-magnetically controlled and the fuel tank capacity is a massive 14 litres.

The machine is fitted with a single lever adjuster and a high-back comfort seat fitted onto parallel suspension requiring no tools to adjust its position.

Stiga's unique articulated chassis design ensures that the rear wheels follow exactly in the path of the front cutter deck as the chassis pivots at the centre point of the front and rear axles, leaving you free to concentrate on looking forward at the grass that you are about to cut rather than worrying about the obstacles that you have just passed.

With hydrostatic drives and heavy-duty alloy decks, the Honda range of core lawn mowers is the professionals' choice for the medium-sized or larger lawn. Featuring high-density alloy decks, heavy-gauge handlebar tubing with additional support brackets, front deck guards, handlebar cable protectors, shaft drives and heavy-duty gearboxes, you can be sure these mowers will meet the most demanding needs.

HUSTLER Trimstar

The Hustler TrimStar is the most innovative walk-behind machine in the professional mowing industry. Patented H-Bar steering is the easiest-to-use walk-behind system in the field.

- Patented H-Bar steering system.
- Wide stance for increased stability.
- Superior drive system.
- Floating decks adjustable from operator's position.
- 36", 48" or 54" side discharge decks.
- Easy-to-operate deck lift makes deck height adjustment a breeze.

The easiest-to-use walk-behind system in the field.

ALLETT BJB42 Tractor-Mounted Scarifier

Part of Allett's Professional Range, the BJB42 Tractor-Mounted Scarifier has a large working width with contra-rotating blades which make fast work of seasonal scarification and turf renovation.

The standard working depth is infinitely variable, down to 20mm with standard blade spacing or even deeper if every other blade is removed. The machine is PTO-driven, and is able to implement quick and effective scarification and aeration with removed materials being gathered in a rear collection box.

A tipping rear collector minimises clear-up time, saving on effort and labour costs.

Being compatible with small tractors, the BJB42 is perfect for sports arenas or ornamental lawns such as football pitches, public parks, golf greens and tees.

Its design enables scarifying, cutting lateral runners and root removal whilst decompacting.

Well-proven machines for a first-class finish.

ALLETT Professional Cylinder Mowers

Allett continue to develop their professional mower range with the introduction of the 20-, 24-, 30-, 34- and 42-inch cut machines. Their professional cylinder mower range comprises specialist mowers for golf and bowling greens, sports stadiums, cricket wickets and outfields, as well as public and private parks and gardens.

In addition, Allett was honoured when the Commonwealth War Graves Commission chose Allett mowers almost exclusively to maintain the grass within its immaculate cemeteries in Britain and around the world.

Today, the Allett brand of professional walk-behind cylinder mowers leads their various market sectors, providing users with expertly-built, reliable, well-proven grass-cutting machines which produce a seemingly effortless first-class finish to every lawn on which they are used.

Every one of Allett's powerful, smooth-running yet quiet machines is supported by exceptional pre- and after-sales care and attention, a service the company is delighted to offer to its customers worldwide.

Innovative grass-cutting solutions.

AMAZONE Groundkeeper and Profihopper

Mowing, scarifying, collecting, chopping and rolling in one pass with the AMAZONE Groundkeeper.

You will be won over by the Groundkeeper's exceptional mowing and collection capacity. Whether you cut your grass once a week or once a year, the Groundkeeper will mow and collect the cuttings with continuous efficiency.

With the new extra-strong PowerCompactor, AMAZONE has once again clearly increased the delivery and compacting capacity of the new Profihopper.

Thanks to the PowerCompactor, not only is the operational performance increased but at the same time set-up and non-working times are reduced.

It can be used in almost any mowing operation, especially in damp conditions.

Scarify and mow grass in one pass.

WESSEX CRX Mower Deck

The machine you've been asking for.

The most nimble and manoeuvrable Wessex mower to date.

KEY FEATURES AND BENEFITS

- Full width rollers, front and rear**
- Rollers kept as close as possible**
- Excellent floating capabilities**
- CRX Swing Tip Blades**
- Wide-angle PTO**

- Requires only 35hp Tractor**
- Requires only one Spool Valve**
- Turf tyres**
- Optional highway kit**
- Simple belt tension**
- 5mm steel plate decks**
- Easy cutting height adjustment**
- Tight turn**
- Goldcut blades**

- Precision cut and full width stripe on the turf
- Maximises ground contour following
- Hugs the undulations closely
- Superb cut and easy maintenance
- Tight turn capabilities for increased manoeuvrability
- Economical to operate
- Complements the simplest tractor
- Minimal turf compaction
- Allows road legal towing
- Quick and easy maintenance
- Robust and durable
- 10 - 100mm

CRX 320

WESSEX RMX Mower Deck

Never before has the industry seen a trailed, **Tri-Deck Multicut Mower** boasting exceptional ground contour-following capabilities, with the three decks offering the option of four castoring wheels for maximum manoeuvrability, front and rear rollers for the effect of a professional roller mower, leaving a prestigious, banded effect on fine turf, or a combination allowing longer grass to be tackled effectively.

RMX 560

HONDA ATV Quad Bikes

Honda made the world's first ATV in 1970. Today they are still focusing on ways to make them better. No matter what you need it for, a Honda ATV has the technology and performance you require to get your job done. And with strong build quality and professional support from Lloyd Ltd to rely on, your Honda ATV is sure to last you for many years.

HONDA Foreman ATV.

Big loads, long days – no problem. Some days you feel like it's all uphill. Lucky you've got the Foreman working for you. The low-down torque from the liquid-cooled engine lets you tackle the really rough terrain, as well as those big towing jobs.

Experience has taught you well and you know one thing above all else – you can rely on a Honda Foreman ATV.

Reliable, powerful and professional.

As leading manufacturers of wood chippers, green waste shredders and multi-task machines, GreenMech Ltd offer you:

- High performance and easy operation.
- Low maintenance, with a complete after-sales service.

GreenMech ranges offer diversity of use and several attractive features:

- Wood chippers up to 220mm/8.5inches.
- Road-tow, tracked and PTO-driven, petrol or diesel-powered models.
- Unique Disc Blade technologies.
- No-stress power control system
- Turntable options.
- High quality coatings (1,000 hour salt spray).
- Noise level reduction system.

Demonstrator available.

Engineering for a greener environment.

ELIET Shredders.

A professional machine must have the quality that is needed to match its purpose.

That's why ELIET firmly decided to choose an all-welded frame that is manufactured from high quality steel plate and that is fully welded. Developed from a low-maintenance perspective, so that checks and maintenance do not become time-consuming and dreaded activities.

All ELIET chippers feature everything for easy manoeuvrability. The large wheels on ELIET machines immediately attract your attention. The pneumatic tyres ensure that the vibrations are optimally absorbed, so that the machine is more stable.

- Minimum management costs.
- Maximum flexibility and time savings.
- Operating reliability guaranteed.
- Maximum yield.
- Infeed opening
- Well-organised dashboard showing useful features.
- Easy feeding.

AS 940 Sherpa 4WD Ride-on Mower.

The remote-control AS 940 Sherpa Four-wheel redefines safety, climbing ability, and performance for ride-on mowers. Permanent four-wheel drive with limited-slip differential provides directional stability when traversing the slope, and optimal braking. A stable safety bar and low centre of gravity ensure maximum safety, even on extremely steep and demanding terrain.

Economical and ecological management of your cutting waste.

With an impressive range covering many applications, TRILO's trailed and mounted blowers and vacuum sweepers are an ideal addition to our product offering.

TRILO provides solutions for daily, time-consuming jobs, such as grass-cutting, collecting grass, leaves and debris, and removing them from the work site.

TRILO machines are especially designed for professionals in public area maintenance, large green area maintenance, golf course maintenance, airport maintenance and more.

Demonstrators available.

Designed for professional maintenance.

BOMFORD Hedgecutters

Bomford's range of Arm Mowers provides a vast choice in both specification and budget. Starting from the smallest compact tractor to large watercourse management models, there is a model for every landscape. Machines are built to the highest standards in their UK factory with the utmost care and attention given to ease of control and operator comfort.

The Hawk is perfect for farmers, contractors and municipal environments. Fitted with a powerful 104-litre drive system, and options to upgrade to 125-litre, the Hawk offers a machine for every application. Available in 5.4m, 6.0m or 6.5m reaches.

The Kestrel hedge trimmer and verge mower, with a 5.0m reach and a choice of flail heads or a 1.5m sheartim cutterbar, is perfect for the farmer who needs professional features and robust design, offering real value for money. The Kestrel is very popular with dairy farmers who wish to maintain stock boundary hedges and water courses, with hassle-free operation and economic cost.

BRIAN JAMES TRAILERS

BRIAN JAMES TRAILERS CarGO Compact

The CarGO Compact range presents commercial quality in a convenient mid-size package, appealing to many professional and private users. Lightweight, robust construction ensuring full commercial durability, CarGO Compact is fit for purpose. The models feature wheels under-bed for convenient deck access. Attractive to private and business operators alike, CarGO Compact is able to deal with a variety of tasks and a wide range of optional equipment is available.

Heavy equipment does not damage the trailer as the reinforced deck uses 18mm HD phenol ply, framed and supported by substantial steel chassis sections.

The ladder rack is convenient for carrying over-length materials and there are easy-securing tie-down points.

The low and light chassis with 'soft ride' suspension delivers a stable, comfortable performance.

The hot-dip zinc-galvanised chassis has a unique 5-year warranty.

Convenient mid-sized trailers for professional and private users.

Service

Regular servicing for unrivalled quality.

Whatever equipment or machinery you rely on to support your business or home, it is essential to protect the investment you have made by keeping that machinery regularly serviced.

At all our Lloyd Ltd branches we have experienced technicians who have undertaken extensive and regular manufacturer training to ensure that they are the best people to maintain and repair any groundcare equipment. Our workshops are equipped with the latest tools and diagnostics to make sure that the most up-to-date techniques and software updates can be applied.

We also offer out-of-hours emergency servicing and repairs as needed.

Parts

Express delivery for minimum downtime.

At Lloyd Ltd we understand that the smooth running of your machinery is fundamental to the success of your organisation's operations.

To ensure that we provide our customers with the support they expect and deserve, our parts departments stock thousands of essential parts and accessories to reduce potential downtime and get that equipment back to full performance as quickly as possible.

Whatever our customers' requirements, we are here to help.

Contact our Parts Department to find out more about our parts support.

Flexible solutions

Lloyd Ltd

HIRE TO BUY

Flexible solutions to suit your business
From one week to five years

At Lloyd Ltd we appreciate that sometimes you need a particular item of machinery for a one-off job or medium-term project for which buying that item is not cost-effective.

For just those circumstances we have developed an extensive range of equipment for hire, from compact tractors to ride-on mowers and attachments.

Should you have a particular hire requirement or wish us to quote for a hire package, please contact our Groundcare Sales Specialists as they will put together a tailored quotation for you.

Lloyd Ltd. NEWCASTLE and BISHOP AUCKLAND

Fixed cost hire options

Lloyd Ltd offer customers lease-hire options on all groundcare equipment for up to five years - inclusive of all maintenance and warranty.

Why hire from Lloyd Ltd?

- We are a main dealer for all the products we hire so no-one knows or looks after that equipment better than we do.
- We offer mobile and on-site aftersales support to keep your equipment performing at its best when you need it most.
- You can hire the equipment for whatever duration best suits your needs.
- We have access to a variety of machines for different jobs, giving you the best available choice.
- A collection and delivery service is available (subject to availability and distance).

If you have a particular hire requirement, please contact your local Lloyd Ltd Groundcare Sales Specialist with the following information and we would be pleased to help.

- **Type of machinery**
- **Duration of hire**
