SPECIAL OFFER EasyCheck

1+16

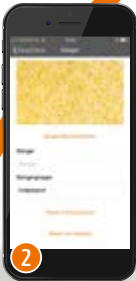

**When purchasing a ZA-V or ZA-TS
fertiliser spreader or ZG-TS
you receive 16 EasyCheck mats free!**

When purchasing a new AMAZONE ZA-V, ZA-TS or ZG-TS fertiliser spreader during the campaign period from 01/11/2019 to 31/01/2020, you will receive 16 EasyCheck mats for free. The offer is aimed at private business customers. For a binding quotation, please contact your participating AMAZONE sales partner. Offer only valid in Great Britain. Cannot be combined with any other offer!

1 Choose the fertiliser spreader and the working width in the App

2 Select the fertiliser

3 Displays the position of the mats

4 Photograph the mat

5 Confirm the photographed value

6 The value for each mat is displayed in the App

AMAZONE
EasyCheck

Scan here to download the App free of charge

7 Lateral distribution and the setting recommendations are displayed

Digital, mobile test kit for the easy optimisation of the lateral distribution

AMAZONE now offers EasyCheck for checking and optimising fertiliser spreaders in the field. The EasyCheck system now consists of just 16 lightweight rubber testing mats and the EasyCheck App for smartphones. The test mats are positioned in pre-determined distances away from the tramline. Then the relevant tramline is spread and the mats with the fertiliser granules laying on them are photographed. The App now compares automatically how much fertiliser has been collected on each test mat and sets the results of the individual rows to an average. In cases where the spreading results are not the optimum, the App suggests readjustments for the setting of the relevant fertiliser spreader.

ZA-V – The new precision spreader

- Working width: 10 m up to 36 m
- Up to 30 km/h · up to 33 ha/h · up to 390 kg/min
- Hopper capacity: 1,400 l up to 4,200 l
- Active agitator with minimal fertiliser damage
- Optional 200 Hz weighing technology
- No calibration necessary – automatic adjustment of the application rate

▶ **See our special offer on the top-selling ZA-V ecoSUPERIOR spreader on the reverse!**

ZA-TS – The high output spreader

- Working width: 15 m up to 54 m
- up to 30 km/h · up to 50 ha/h · up to 650 kg/min
- Hopper capacity: 1,400 l up to 4,200 l
- Intelligent, active agitator (reverses or switches off completely)
- AutoTS or ClickTS disc integrated border spreading system
- 200 Hz weighing technology, no calibration necessary – automatic adjustment of the application rate
- ArgusTwin spread pattern monitoring for automatic adherence to the working width under changing environmental influences

ZG-TS – The professional high-performance fertiliser spreader

- Working width: 15 m up to 54 m
- Hopper capacity: 7,500 l or 10,000 l
- AutoTS disc integrated border spreading system
- Optionally with steering axle with 28 ° steering angle
- On-line weighing system ProfisPro: Weighing signal offers continuous on-line calibration of application rates, intelligent fill level management and safe braking force control for quicker road journeys
- ArgusTwin spread pattern monitoring for automatic adherence to the working width under changing environmental influences

Spreader Application Center

Exemplary service – for more than 25 years

The settings are crucial!

With the Spreader Application Centre, AMAZONE offers even better customer service. In addition to the already well-established fertiliser laboratory and spreading hall, the Spreader Application Centre now also includes the areas of “Test and Training”, “Data management” and the relevant “Knowledge transfer”.

FertiliserService – you can contact us via:

Our FertiliserService works beyond limits. Because no matter whether your fertiliser spreader is 1 or 50 years old, we are always by your side with competent and reliable assistance.

Comparison between testing trays and mats!

“The time required is about 20 percent less than with trays.”

(Ulrich Lossie, DEULA Nienburg – “agrarheute” magazine · 02/2019)

AMAZONE EasyCheck in a comparison test in “agrarheute” magazine – February 2019:

“Many farmers buy a test kit together with the fertiliser spreader. Then it stands unused in a corner. One reason is the impractical transportation. The new EasyCheck rubber mats from AMAZONE offer so many advantages. They are smaller and easier to handle.”
