

Bale Shredder 330

The 330 can be converted from mounted to trailed

Compact But Surprisingly Large Capacity

The unique beater, comb & concave will shred straw, silage, hay and short chop straw at variable lengths

All electric controls as standard

Adjustable concave screen louvers, vary chop length

The shorter chop can be varied in length. The Chopping mechanism can be withdrawn for service. All chopping blades on the 330 are protected against stones and other objects. The unique drum concave design throws less stones. The top bank of knives gives a short
