Lloyd Ltd: investing for your future

At Lloyd Ltd we understand the importance of technology in supporting farming today, which is why we have invested not only in New Holland's Precision Land Management (PLM) solutions, but, as well as using the RTX network, we have also developed our own RTK network to deliver those solutions direct to our customers.

In addition, our own dedicated Group PLM Specialist Mark Harwood will be with you every step of the way, working with you to identify the correct PLM solution for your operations, installing it and testing it fully, and then providing back-up support for extra peace of mind.

# PLM PACKAGES

Find the right PLM plan for your needs.

On the following pages, we have created a simple guide to show you how different levels of investment in your PLM solution offer different levels of support and functionality, from our entry-level Blue package to the premium Gold solution.

As our PLM Specialist will work with you to choose the right solution for your particular farm operations, you can rest assured that you will be making the right level of investment to deliver the solution you require, with scope to change should circumstances require it.

Should you feel that you are not yet ready to sign up to a full package, we do offer a “pay as you go” approach.

All prices include the annual subscription for the services.
