# Take a shortcut to the best playing experience

Walking onto a perfectly cut, lush golf course can be breathtaking. Rolling fairways, precisely cut greens, and challenging roughs – all combining to provide hard-to-match experiences.

However, creating and maintaining a course's looks and overall shape is a demanding occupation and a calling for detail-oriented, quality-conscious greenkeepers and maintenance crews. With Husqvarna as a partner, the daily routines can be carried out easily and efficiently. With autonomous solutions specifically developed for golf courses, you're set to deliver an experience beyond the ordinary – every day.

This brochure gives a quick overview of our broad range. For all product details, technical data and prices, visit husqvarna.com

**Sir Nick Faldo**
Six-time golf major champion

"I'm really proud to be partnering with Husqvarna, as it helps build the future of golf course management. What their technology is doing for golf courses is truly changing the game – I've heard firsthand how greenkeepers now have more time to spend on other areas of the course, such as the greens, which is driving a real improvement for players."

## Consistent results – every day

No matter if you need to mow fairways, hilly roughs, teeing areas or a tricky area around the clubhouse – there's always a Husqvarna robotic mower perfectly tailored to the task. The mowers work tirelessly, continuously and according to a schedule set by you, delivering consistently impressive results, day in, day out.

## Time to perfect the details

Our autonomous mowers operate day and night and require minimal attention, freeing up your staff to finally undertake those other important jobs around the course. From allowing your staff to perfect the finish to taking care of bunkers, our mowers help you create an outstanding player experience.

## Lower the cost, improve the results

Robotic mowers will help deliver excellent results on various areas. The mowers can handle both fairways and roughs, with adjustable cutting height from 10 to 50 mm. The total ownership and service cost may also be lower than re-investing in conventional machines.

## Mowing that shows that you care

Imagine being able to mow areas of the course while golfers continue to play uninterrupted. Our autonomous mowers mean no more sound pollution, no fumes from diesel engines, and no more waiting for greenkeepers to complete a task, keeping play moving and golfers happy.

# A truly comprehensive golf course solution

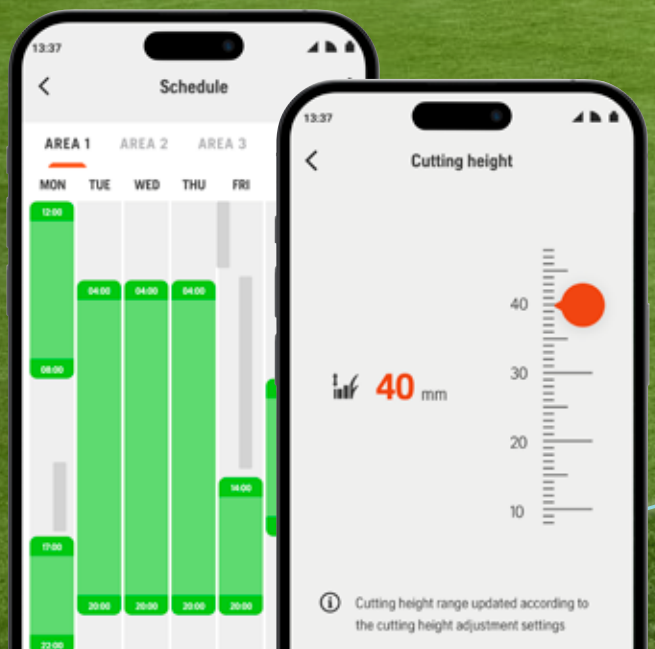

Husqvarna's autonomous turf care solutions are designed to handle a wide variety of golf course conditions. You monitor and control your entire fleet of robotic mowers through a single app with Husqvarna Fleet Services™. Wire-free mowing is enabled by Husqvarna EPOS® satellite navigation, now with new connection options. With greater flexibility, easier management, and precision tailored to your course, Husqvarna delivers a truly comprehensive solution for golf course maintenance.

### A product range ready for your challenges

Steep slopes? No problem for our all-wheel-drive model. Large, flat fairways? Efficiently maintained with high-capacity CEORA® robotic mowers. And for everything else, there's Automower® 580L EPOS® robotic mower, specifically developed for golf courses with its powerful 80W motor and rubberised protection for those stray balls.

### Set your preferred schedule

You easily set the mowing schedule in Husqvarna Fleet Services™ to maximise playing time or to accommodate other factors. Depending on the size of the area and your grass quality needs, you set how often the entire area should be cut.

### A healthy strong turf

Our robotic mowers cut the grass every day with high-quality blades. This not only supports a premium result and finish but can also help with healthy grass and a dense, strong turf.

### One mower – multiple mowing heights

In contrast to conventional cylinder mowers, the same mower can be assigned to take care of an entire hole area, with the cutting hight automatically adjusted in between working on fairway, semi-rough and rough. The height adjustment is easily controlled in Husqvarna Fleet Services™, removing the need for you to send out different machines or manually adjust cutting heights.

NEW!

### Satellite guidance with three ways to connect

Husqvarna robotic mowers are controlled via our satellite-based system, EPOS®, that uses RTK-GNSS technology. The latest additions to the system are Husqvarna Cloud and our 4G reference station. Set the area you want maintained, then the fully cloud based system or the physical reference station will safeguard the exact positioning. The reference station is even more exact than the cloud-based solution. Read more on page 9.

### Easy maintenance

Husqvarna robotic mowers can help you save on both time and expenses when it comes to maintenance. With one press of a button in the app, you can send all mowers simultaneously to the service station. Once there, you easily wash them off, switch blades and wheel brushes if necessary – then send them back out to work.

### The benefits of light weight

In addition to great mowing results, robotic mowers provide additional benefits. Thanks to the machines' light weight they may contribute to less compaction of the ground, and to making it possible to mow during wet conditions.

## A partnership you can trust!

With Husqvarna as a partner, you can look forward to an convenient and long-term ownership experience. Our representatives and dealers are with you all the way – from pre-planning and installation to service and maintenance.

# A lineup tailored for golf course excellence

Walk around any golf course and you soon discover that no two holes are the same. Instead, each has its own unique maintenance requirements. That's why our robotic mower range has been specifically adapted to be extremely versatile. From cutting heights to dealing with inclines and undulations, our autonomous mowers help to deliver consistently excellent results. No matter the challenge, there's always a Husqvarna robotic mower ready to take on the job.

LEARN MORE

**Informed decisions start with data**

The lifecycle $CO_2$ emissions of Husqvarna CEORA® robotic mowers are up to 83% lower than a P 525DX ride on front mower. This has been proven by third-party LCA.
**Explore the findings at husqvarna.com/lca or scan the QR code**

**HyperCare included**

Pre-planning and optimisation, on-site installation support and training, + follow-up during first month.

FOR LARGE AREAS

## Husqvarna CEORA® 546 EPOS® with RZ 43L

Specifically developed for large area coverage, Husqvarna CEORA® robotic mower has a capacity of up to 25,000 m² in 24h – depending on area type and mowing frequency requirements. Multiple mowing heights for fairway, semi-rough and rough, make it possible for CEORA® robotic mowers to seamlessly move between different parts of the course, changing patterns or height to fit the needs of each area.

- Fairway, semi-rough and rough
- Area capacity: up to 25,000 m² (in 24h)
- Cutting height: 10–60 mm
- Handles slopes up to 20% (11˚) incline
- Up to 25% slope with terrain wheels
- Selectable mowing patterns
- FOTA – firmware over the air

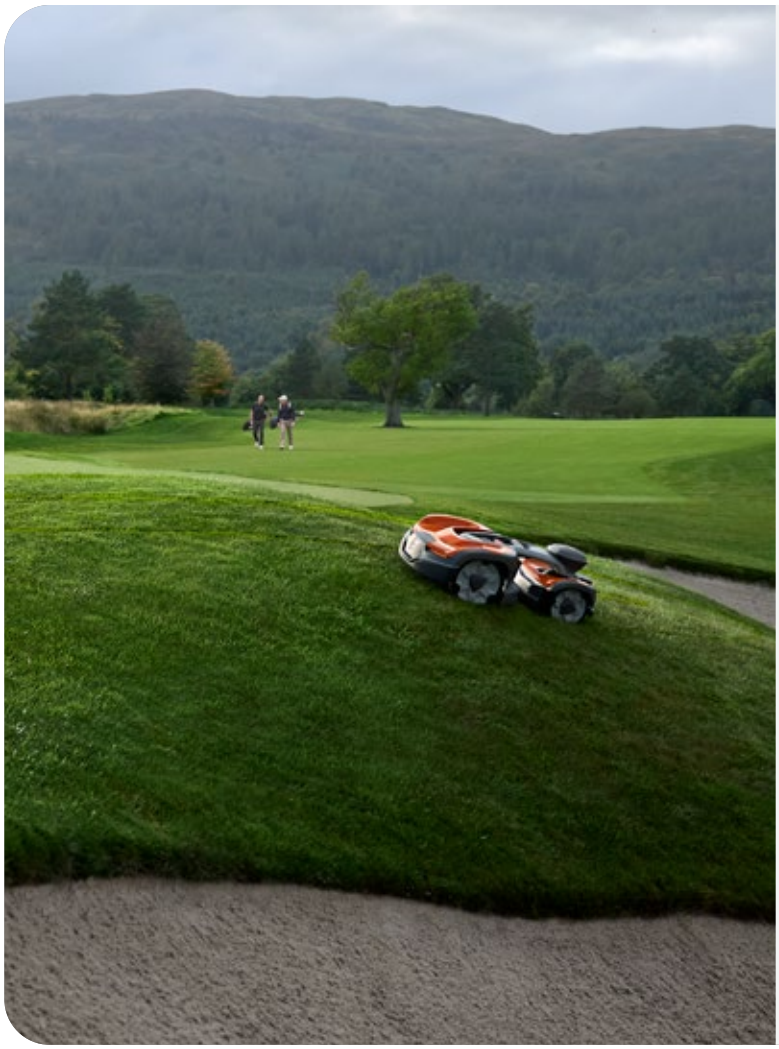

FOR HILLY AND COMPLEX AREAS

## Husqvarna Automower® 580L EPOS®

For medium-sized, hilly and more complex areas of your course, Automower® 580L EPOS® robotic mower is the obvious choice. With its powerful 80W motor, floating heavy-duty cutting system, and pivoting blades, it makes easy work of even the most demanding, dense turf challenges. You can also use many Automower® units for larger areas.

- Fairway, semi-rough, rough, and tee
- Area capacity: up to 8,000 m² (in 24h)
- Cutting height: 10–50 mm
- Handles slopes up to 45% (24°) incline
- Selectable mowing patterns
- FOTA – firmware over the air
- Active wheel brushes
- Rubberised body

FOR EXTREME SLOPES

## Husqvarna Automower® 535 AWD EPOS®

For those wondering if there's a way to use autonomous mowers on steep slopes, our all-wheel-drive mower is the answer. Developed specifically for the most challenging areas in commercial turf care, the mower efficiently handles course obstacles, tough terrain, and slopes with up to 70% (35°) incline, making even those hilly areas of your course something to be proud of.

- Semi-rough, rough and surrounding areas
- Area capacity: up to 3,000 m² (in 24h)
- Cutting height: 30–70 mm
- 70% (35°) all-wheel-drive slope capacity
- Selectable mowing patterns
- Wire installation optional
- FOTA – firmware over the air

EXPLORE RANGE

**Find out more about how robotic solutions makes your workday easier by visiting husqvarna.com/ProRoboticMowers**

# Excellent results on and off the golf course

In addition to the models specifically designed for the course, our range of robotic mowers, include a number of models that will help maintain the surroundings, such as smaller or complex areas around the clubhouse. The low maintenance needs of the mowers will free up valuable time that can be spent on other tasks.

FOR MEDIUM-SIZED, MORE COMPLEX AREAS

## Husqvarna Automower® 560 EPOS®

Robust, powerful robotic mower built for efficient commercial turf care on demanding turf areas. Navigates narrow passages, tough terrain and slopes even in rainy conditions, delivering premium cutting results.

- For club house surrounds
- Area capacity: up to 6,000 m² (in 24h)
- Cutting height: 20–60 mm
- Handles slopes up to 50% (27°) incline
- Selectable mowing patterns
- FOTA – firmware over the air

NEW!

FOR SMALLER, MORE COMPLEX AREAS

## Husqvarna Automower® 540 EPOS®

Powerful robotic mower with 36V onboard power for efficient turf care on complex areas. Handles slopes of up to 50%, and navigates narrow passages, tough terrain even in rainy conditions.

- For club house surrounds
- Area capacity: up to 4,000 m² (in 24h)
- Cutting height: 20–60 mm
- Handles slopes up to 50% (27°) incline
- Selectable mowing patterns
- FOTA – firmware over the air

FOR SMALLER, MORE COMPLEX AREAS

## Husqvarna Automower® 520 EPOS®

Robotic mower designed for commercial use on smaller areas. Handles complex turfs and navigates narrow passages, obstacles, tough terrain and slopes with ease.

- For club house surrounds
- Area capacity: up to 2,500 m² (in 24h)
- Cutting height: 20–60 mm
- Handles slopes up to 45% (24°) incline
- Selectable mowing patterns
- FOTA – firmware over the air

HOW IT WORKS

# Husqvarna EPOS® satellite guidance

Husqvarna EPOS® (Exact Positioning Operating System) utilises satellite signals to create virtual boundary lines. Position is calculated through RTK GNSS technology, and so called correction data is distributed to the mower in different ways – depending on preference and application.

## Three ways to send correction data:

4G NEW!

### EPOS® RS 4G reference station

- Correction data over 4G
- One single station needed (range up to 25 km)
- Accuracy typically 1–2 cm (within 10 km range)
- Requires cellular coverage on the site

NEW!

### EPOS® via Husqvarna Cloud

- Correction data over 4G Cloud
- No need for physical installations
- Accuracy typically 1–6 cm
- Requires cellular coverage on the site

### EPOS® RS5 reference station

- Correction data over short distance radio (range up to 500 m)
- Expand coverage by installing several EPOS® RS5 reference stations (in repeater mode)
- Accuracy typically 1–2 cm

NEW!

### Solar charger systems

For off-grid areas of the course where power infrastrucure is not available, or difficult to install, our solar panel systems offer an alternative power supply solution for your Automower® robotic mower and EPOS® reference station.

NEW!

### CEORA® Golf ball deflector

Get the driving range cut with CEORA® robotic mowers, even when there are golf balls left on the range. The recommendation is to mow during the time that the driving range is not in use.

NEW!

### Vision technology accessory

Husqvarna's vision technology – available with the new generation of Automower® robotic mowers – is an AI-supported camera feature that enables the robotic mower to visually detect and avoid obstacles on the turf, day and night. This option allows the mower to classify the type of detected object, for example a ball or a sprinkler head, and keep mowing efficiently. It also enables nighttime mowing with precision.

### Active wheel brush kit

Active wheel brushes that remove grass clippings from the drive wheels to improve traction. Standard feature on Automower® 580L EPOS® robotic mower.

NEW!

### House

Protects the mower against harsh weather and provides shade while charging. Available for all Automower® models.

NEW!

### Turf brush

For improved after-cut appearance primarily on fairways. Breaks up grass clumps and leaves a more uniform surface. Available for Automower® 580L EPOS®.

### Cutting discs and blades

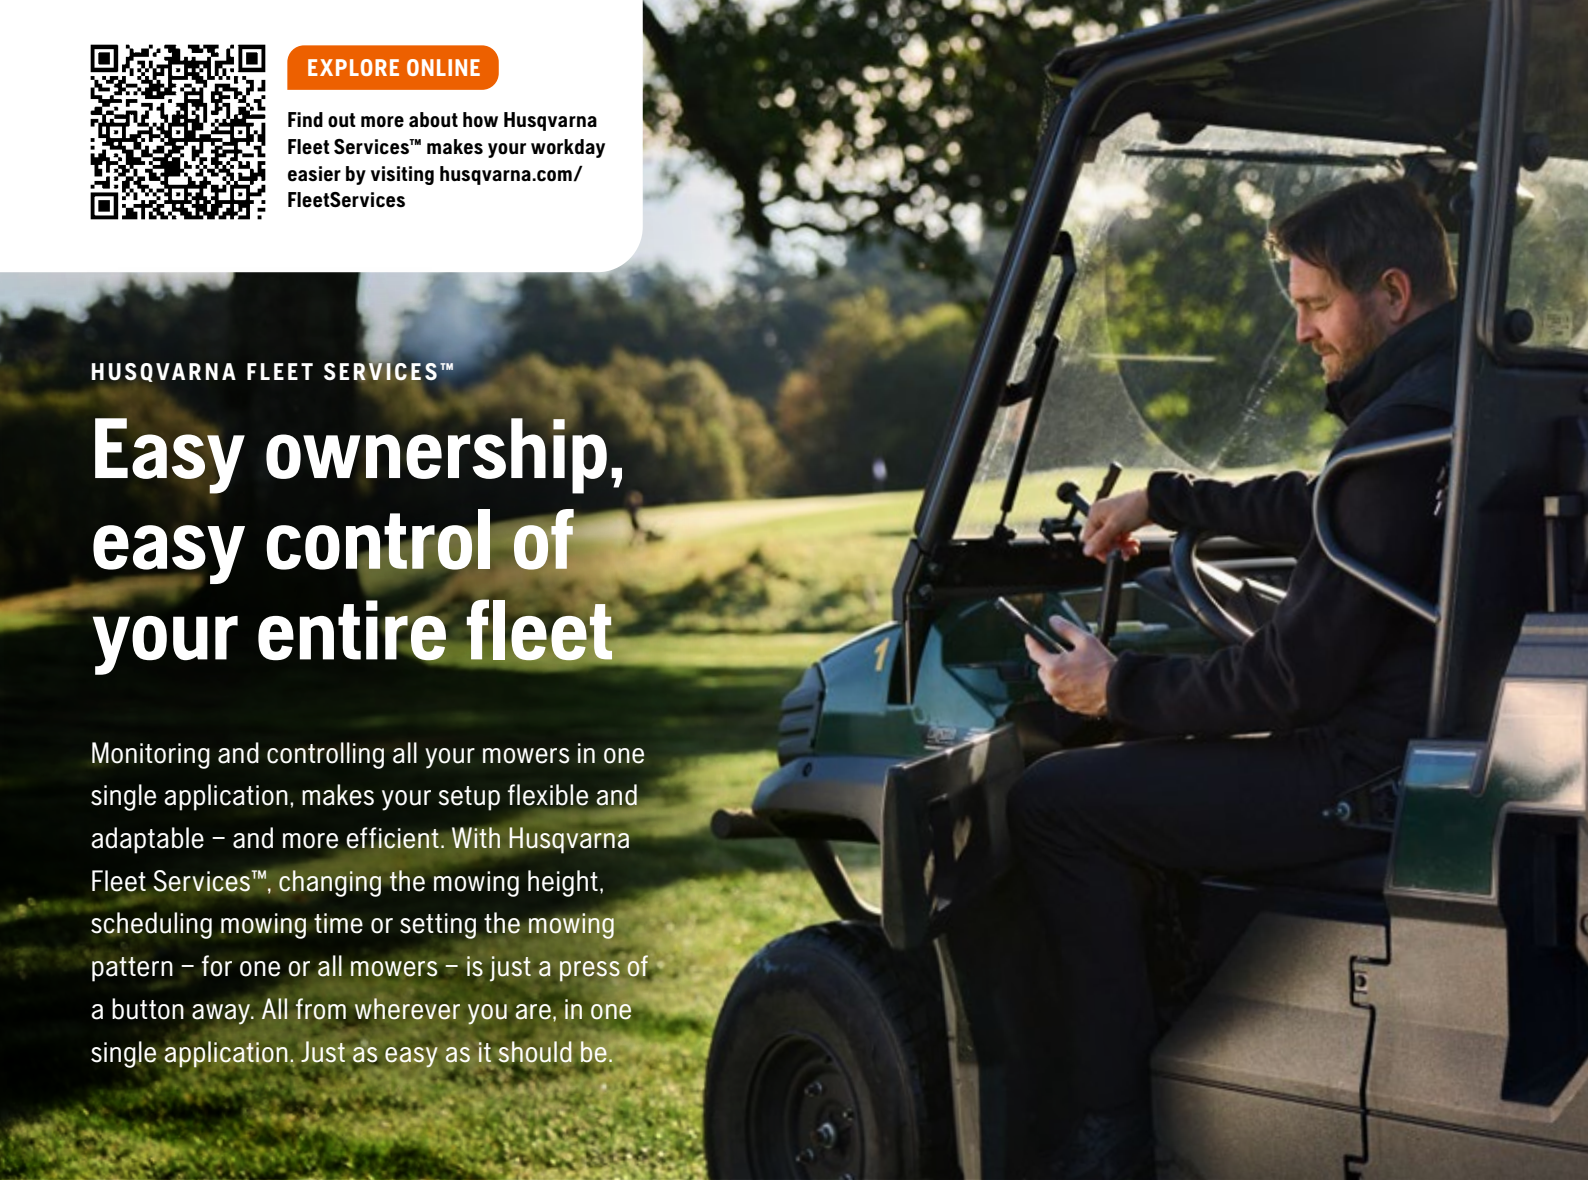

The cutting discs have a quick-release design. You easily can prepare it in the workshop, for extra swift and smooth maintenance in the field, or at the service point. The Enhance HSS blades are made from carbon steel and have two cutting edges welded with high speed steel. Extra sharpness and longevity for use in tough grass areas.

HUSQVARNA FLEET SERVICES™

# Easy ownership, easy control of your entire fleet

Monitoring and controlling all your mowers in one single application, makes your setup flexible and adaptable – and more efficient. With Husqvarna Fleet Services™, changing the mowing height, scheduling mowing time or setting the mowing pattern – for one or all mowers – is just a press of a button away. All from wherever you are, in one single application. Just as easy as it should be.

STATUS OVERVIEW

## Maximise your uptime

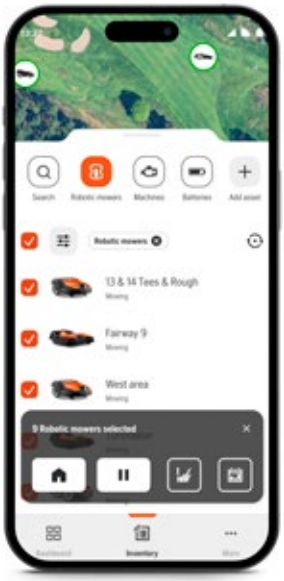

With the status overview, you get crucial information on what robotic mowers require your attention due to eventual errors, standstills or service needs. This helps you plan ahead to ensure maximum uptime for your entire robotic fleet.

REMOTE MANAGEMENT

## Convenient control

Using the app, you can manage and adjust the settings for your robotic mowers and work areas, from wherever you are. Instantly set mowing schedules, adjust cutting heights or change the mowing patterns for each of your mowers.

BATCH COMMAND

## One command for multiple mowers

Mowers can be "tagged" to different teams, or to different locations, and then grouped to enable batch commands directly from your phone or desktop. For example, with a single command you can send every mower on the course to the service point.

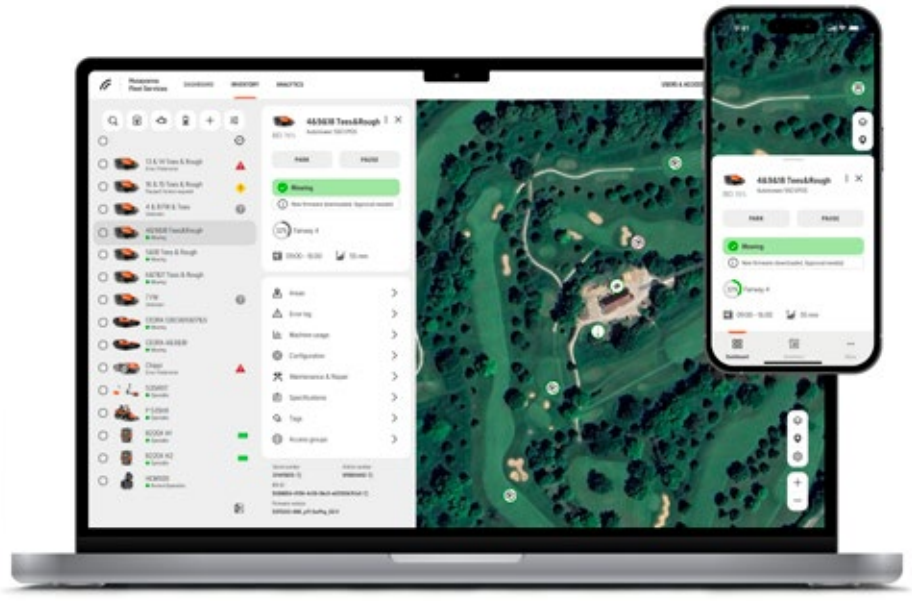

ROBUST AND INTEGRATED

## One fleet management system for all your machines

Husqvarna Fleet Services™ has been designed to help you manage your entire fleet, easily and efficiently. That means that not only can you use it to control and monitor your robotic mowers, but you can also keep track of your grounds crew equipment – all from your desktop or any mobile device.

MANAGING THE AREAS

### Install and edit work areas

When installing a Husqvarna robotic mower on a new work area, you easily define the area by steering the robotic mower along the outer edges, using the Husqvarna Fleet Services™ app as a remote control. Easily pause an ongoing installation to create stay-out zones or modify work areas, directly in the app.

MAP VIEW

### Keep track of exact locations

Want an overview of all your robotic mowers? Just check the map view. Thanks to the built-in GPS, you get real-time info and always know the exact location – and status – of every robotic mower on the course.

MULTIPLE PLATFORMS

### Choose your way of working

Husqvarna Fleet Services™ is available both on desktop, and as a mobile device application. Since the system synchronises information, you have access to all your info, no matter what device you're using.

# Services by Husqvarna

An essential part of easy, trouble-free ownership is the peace of mind that comes from a trusted partnership. With Services by Husqvarna, you can easily lease the products you need, with no upfront investment costs, and with repairs and yearly service included. Or – if you wish to own your products – you can add a beneficial service contract that will provide you with the service needed to maximise that crucial uptime, keeping your course well-maintained and ready for play.

EXPLORE LEASE PLUS

**For more in-depth information on Lease Plus, please visit husqvarna.com/LeasePlusPro**

HUSQVARNA LEASE PLUS

## Convenient financing of your equipment

Make a faster shift towards a more efficient operation with your Husqvarna products. With operational leasing, you get a convenient long-term rental without any upfront investments. The predictable and fixed monthly fee during the contract will help optimise the cash flow and financial planning of your business.

- Up-to-date product
- No upfront investments
- Off-balance sheet item(s)
- Comprehensive insurance coverage, including theft protection, flooding, lightning and vandalism
- Repairs*
- Planned maintenance according to set service plan
- Software updates
- Genuine blades for robotic mowers**
- 3 or 5 years contract

* For more information about what is included in and excluded from the repairs, please see the applicable Terms and Conditions
**Seasonal handout after maintenance; 45 pcs for Automower® and 300 pcs for CEORA® robotic mowers

**Free up capital for investments**

**Up-to-date products**

**Insurance coverage**

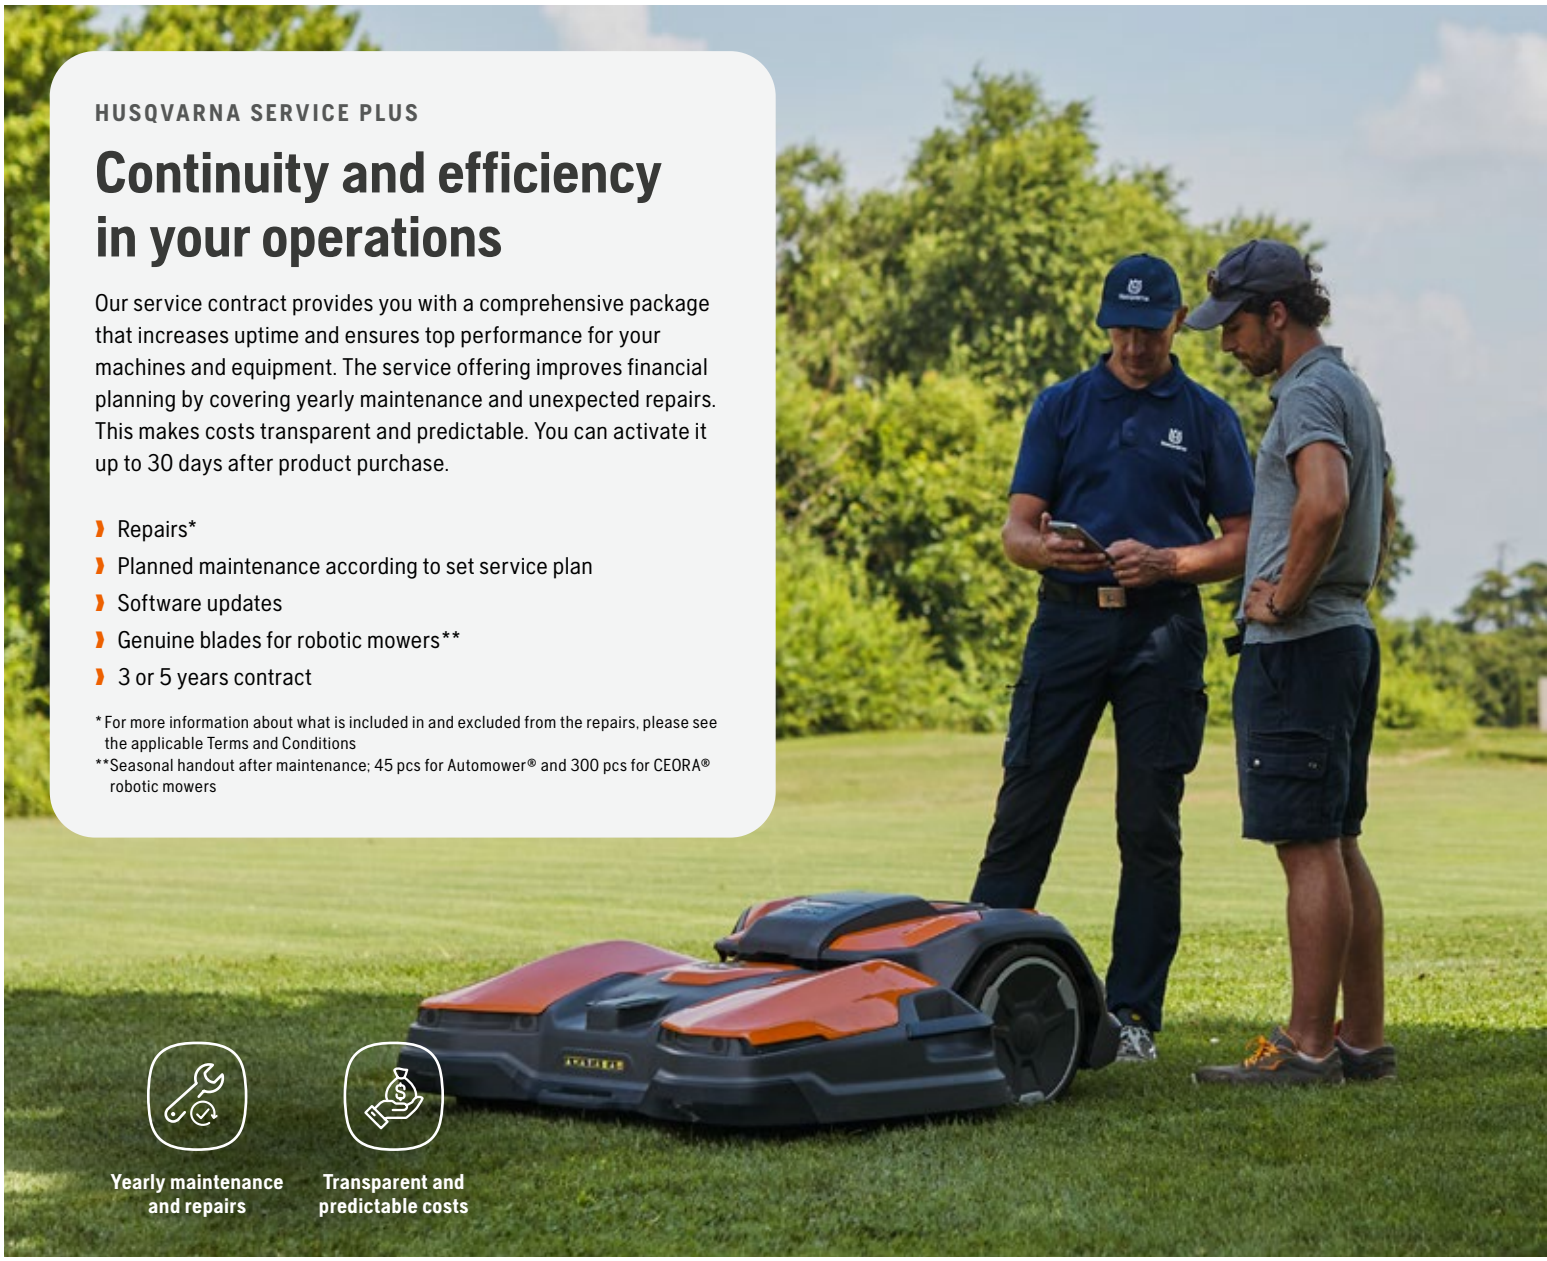

HUSQVARNA SERVICE PLUS

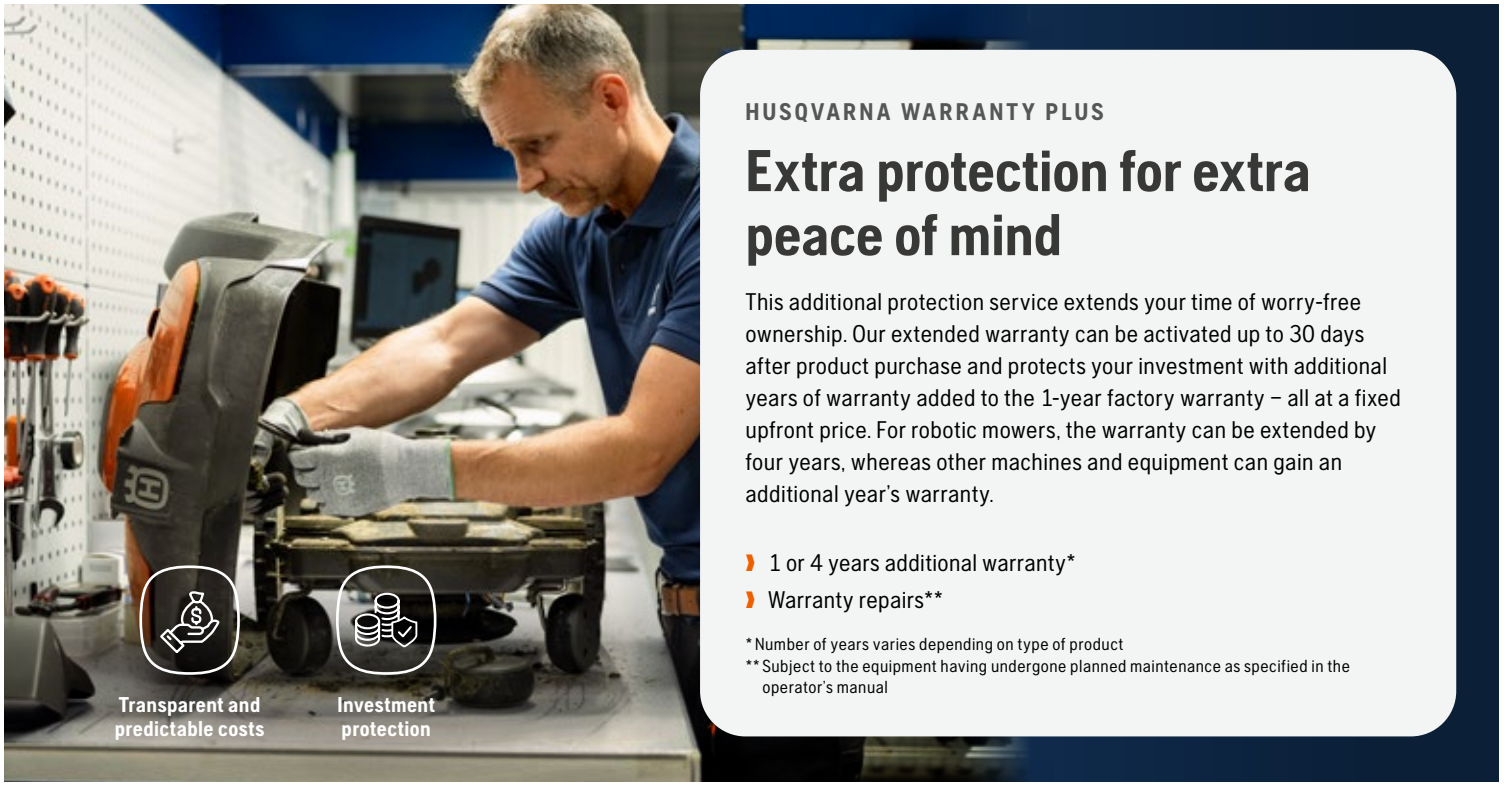

# Continuity and efficiency in your operations

Our service contract provides you with a comprehensive package that increases uptime and ensures top performance for your machines and equipment. The service offering improves financial planning by covering yearly maintenance and unexpected repairs. This makes costs transparent and predictable. You can activate it up to 30 days after product purchase.

- Repairs*
- Planned maintenance according to set service plan
- Software updates
- Genuine blades for robotic mowers**
- 3 or 5 years contract

* For more information about what is included in and excluded from the repairs, please see the applicable Terms and Conditions
**Seasonal handout after maintenance; 45 pcs for Automower® and 300 pcs for CEORA® robotic mowers

HUSQVARNA WARRANTY PLUS

# Extra protection for extra peace of mind

This additional protection service extends your time of worry-free ownership. Our extended warranty can be activated up to 30 days after product purchase and protects your investment with additional years of warranty added to the 1-year factory warranty – all at a fixed upfront price. For robotic mowers, the warranty can be extended by four years, whereas other machines and equipment can gain an additional year's warranty.

- 1 or 4 years additional warranty*
- Warranty repairs**

* Number of years varies depending on type of product
** Subject to the equipment having undergone planned maintenance as specified in the operator's manual

**EXPLORE FRONT MOWERS**

**Find our entire range of front mowers and attachments by visiting husqvarna.com/FrontMowers**

# Husqvarna front and hover mowers

Complementing our robotic mower offering, we also provide a range of commercial, state-of-the art, powerful front mowers with a wide range of exchangeable cutting decks and attachments, as well as our walk-behind hover mower, perfect for tricky bunker edges.

### Hybrid power

The high-capacity hybrid engine of Husqvarna P535HX front mower makes it easy to switch between diesel and fully electric drive, minimising disturbance to the concentration of the players. The improved graphic user interface and the built-in connectivity provides perfect control of your machine with cutting widths up to 180 cm.

### Flexidrive remote control

The 2-in–1 concept with remote control on the Husqvarna P 524XR EFI front mower offers seamless transition between seated and remote mode. The operator can mow ordinary surfaces seated and mow hill sides and slopes with remote remote control,

### Wide range of attachments

From the powerful PTO driven blower, via flail mowers and brooms with collectors to snow ploughs – our front mowers are a versatile and flexible solution to an impressive range of challenges on your course or on the surrounding areas.

### Husqvarna GX 560

Our hover mower has been specifically designed for areas that are hard to maintain. With its air cushion technology, it delivers a premium result on steep and complicated areas, such as bunker edges. The product's design makes it possible to use on slopes of up to 45°.

EXPLORE ONLINE

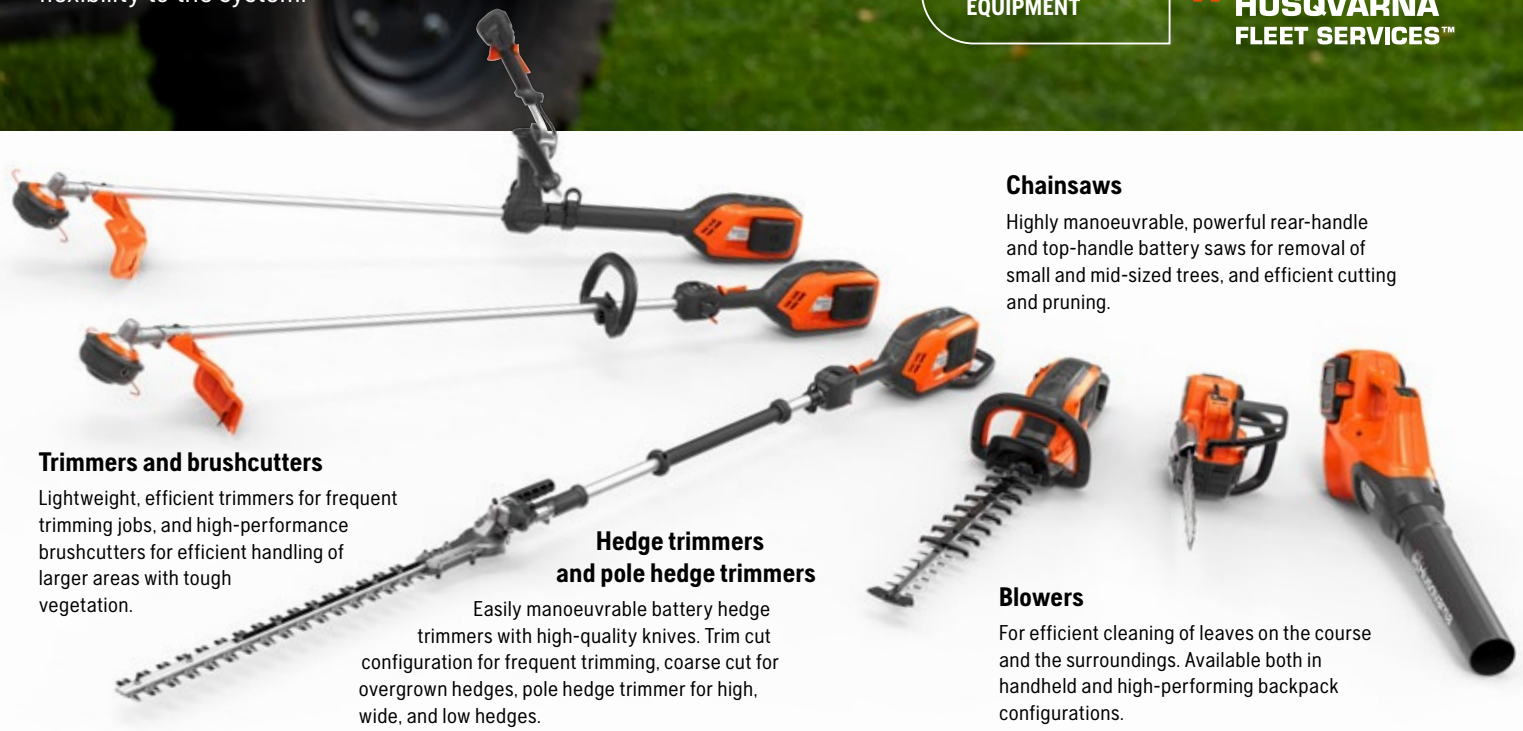

**Explore our entire range of battery products at husqvarna.com/ProfessionalBattery**

# Grounds care maintenance equipment

For grounds crew work, the benefits of our comprehensive battery ecosystem is hard to match. The machines and batteries are designed to enhance operator comfort and be easy to work with, well balanced and lightweight, delivering all the power needed to fine-tune the hedges, trees and grass edges around the golf course. The smart charging and transportation options bring additional flexibility to the system.

**AN EASIER WAY TO KEEP TRACK OF YOUR EQUIPMENT**

HUSQVARNA FLEET SERVICES™

### Trimmers and brushcutters

Lightweight, efficient trimmers for frequent trimming jobs, and high-performance brushcutters for efficient handling of larger areas with tough vegetation.

### Hedge trimmers and pole hedge trimmers

Easily manoeuvrable battery hedge trimmers with high-quality knives. Trim cut configuration for frequent trimming, coarse cut for overgrown hedges, pole hedge trimmer for high, wide, and low hedges.

### Chainsaws

Highly manoeuvrable, powerful rear-handle and top-handle battery saws for removal of small and mid-sized trees, and efficient cutting and pruning.

### Blowers

For efficient cleaning of leaves on the course and the surroundings. Available both in handheld and high-performing backpack configurations.

### Combi machine

Comes with a wide range of attachments – for grass edging, trimming and sweeping – for all-round maintenance tasks. The smart quick connection makes it easy to switch between different attachments.

# We also offer

Lloyd Ltd offers a variety of additional products and services to support our customers both at home and at work.

## SERVICE

To keep your equipment performing at its best when you need it most, our manufacturer-trained technicians are here to carry out annual servicing or ad hoc repairs so that you can enjoy many years of stress-free gardening.

## PARTS

Our extensive Parts Departments stock a wide range of essential parts, including chains, safety clothing and recommended fuels, to ensure your equipment is able to do the job you need.

## LLOYD LTD SECTORS

For over 60 years, Lloyd Ltd has provided a wide range of machinery and support services to our many customers across the Agricultural, Construction, Groundcare and Materials-Handling sectors, as well as domestic Lawncare and the highly-versatile Mercedes-Benz Unimog.

If we can assist with any requirements for these areas, then please do not hesitate to contact us and our sector-specific Sales Specialists will be happy to help.

# Our Branch Coverage

Across the North East, our Sales Specialists are here to provide help and advice across our Groundcare machinery range from our industry-leading premises.
